Mary Burger

Multiple WPRA Champion, NFR Qualifier
and Hall of Fame Inductee

"I have been looking for a great product to draw and cool legs down after strenuous workouts and strains.

I ran into **DIO** at the Little Britches Rodeo Finals where I decided to try **DIO**. I have never been more pleased with a product. I have fixed strains, general stocking up, body soreness and even a broken leg on a kitten.

Needless to say, have used it on myself. I recommend **DIO** to everyone. It's very simple to use and effective.

Love it!"

Kelly Tovar

RNCFR Qualifier

"I fell I love with **DIO** at a rodeo in Oklahoma last year. I had purchased it direct and loved the fact that I could use it with my bot! I pulled Bakken out of the trailer and he had some swelling on a back leg from a scratch that had gone unnoticed. I put the **DIO** on, went and paid my fees, ate a bite came back and the swelling was completely gone!! I was sold from that point on! Today, I never make a run on him or Edwin that I don't use it before and after!! It has helped them both so much!! One of my favorite products and I'm thrilled to be a part of this team!"

Sabrina Ketcham

NFR Qualifier

"I keep a spray bottle mixed 30/70 with water to spray and massage **DIO** onto hot or sore muscles and legs. I also apply the same mix before I load my horses in the trailer. Because it is natural, there is no concern of blistering and the results are cool, tight legs. As a professional barrel racer, I take my horse's care very seriously."

Draw it Out was Designed with Your Horse in Mind

DiO is a unique product that harnesses the anti-inflammatory and anti-pain properties of minerals in a deep penetrating formula that when combined with our Epsom salts profile creates a product with the ability to be used under saddle pads, wraps and boots without burning or blistering. **DiO** is odorless and colorless so there is no clean up. It goes on non-greasy and dries clear – ensuring that there is no mess like traditional poultices or liniments.

DiO was born out of a desire to bring into the market an all natural liniment that was every bit as effective as it's chemical laden counterparts. For years, the only options for liniments were messy, smelly and chemically abrasive. Many of us have tried our horse liniments on ourselves only to break out in hives, become nauseated by the odor or get that odd garlic taste in our mouths. And sometimes we received all three affects simultaneously. Think of your horse's sensitive nose and the times it had recoiled from the smells of chemical based liniments. **DiO** alleviates all of that. Combining over 170 natural minerals, we created an odorless and colorless formula that relieves swelling and soreness as efficiently and effectively as any of its chemical counterparts. **DiO** is so effective that it is a nationally recognized and veterinarian recommended product.

We offer **DiO** in a concentrate that mixes with water to your desired strength. Our **DiO** gel is for use right out of the bottle. Many brands make buying liniments confusing. Often they will have performance versions or extra strength options and sometimes there are so many varieties of one brand that no one knows what to use when! Here at **DiO** we try to keep things as simple as possible. Our original and gel formula are designed to be the strongest available liniment that is safe for use during competitions. We looked at the current offerings of the market and said "Lets throw the kitchen sink at it". After an exhaustive search we packed as many anti-inflammatory and pain relieving properties as we could into each bottle of **DiO**. For us, extra strength and much more is our initial formula and not just an after thought. Our formulas maximize strength and gentleness. No burning or tingling yet tons of fast pain relief. **DiO** products have been designed to be as strong as possible without sacrificing the ease and safety of caring for your horse.

Use for pre/post competition and transporting

Ingredients: Water (Aqua), Sodium, Chloride, Magnesium, Sulfate, Potassium and DiO Proprietary Trace Mineral Blend*

** Our DiO trace mineral blend is comprised of over 170 different minerals, each of which contain anti-inflammatory and pain relief properties. When combined, these minerals create the strongest all natural liniment on the planet!*

How to tips...

If your horse has a tendency to get sore in the back, spray them down with a 50/50 mixture of **DiO** BEFORE you saddle. This will allow the soreness to dissipate during your warm up so by the time your number is called, your horse is limber and pain free. The best news is that this process requires no saddle pad/blanket cleanup.

If you have a rope horse that is a bit sore in the shoulders, spray the horse down before your event. **DiO** helps the body to limber up sore and stiff muscles DURING the event. As you progress through rounds, your horse will be gaining steam while the competition is wearing down.

Do you wrap or boot your horse's legs before and/or during competition? Spraying or rubbing legs with **DiO** before wrapping or booting gives your horse a natural edge.

Heading to Canada from Texas or California from Florida? The same procedure can be used to keep your horse's legs fresh during transportation. And you can leave the same wraps on for the entire trip! Not only will **DiO** provide support and protection, but it will also keep soreness and swelling from building up. We recommend keeping the wraps moist via spray bottle, although plastic wrap (like Saran-wrap) outer layer works too. Both methods are effective in protecting your horse over long trips.
