ROYAL CANIN®

CHOOSE BREED NUTRITION MADE JUST FOR YOUR FRENCHIE

At Royal Canin, we believe that French Bulldogs are unique from the inside out-from their affectionate and playful personality right down to their every nutritional need. That's why our Breed Health Nutrition® formulas are precisely tailored to meet their breed-specific needs from puppyhood to adulthood.

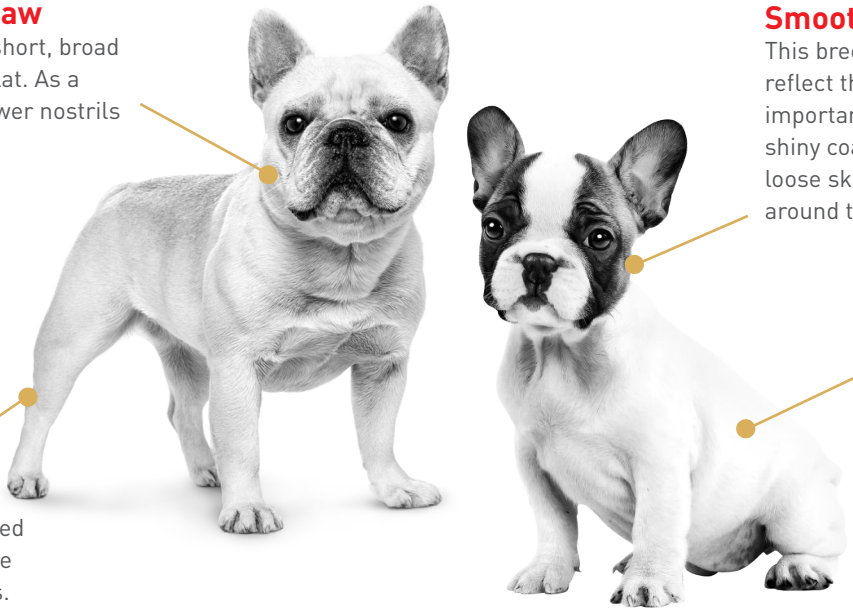

YOUR FRENCH BULLDOG'S UNIQUE CHARACTERISTICS

Brachycephalic Jaw

French Bulldogs have short, broad jaws that may appear flat. As a result, they have narrower nostrils and smaller airways.

Smooth, Short Coat

This breed's skin and coat can reflect their state of health, so it is important to maintain their short, shiny coats and care for the soft, loose skin that falls in wrinkles around their face.

Muscular, Compact Stature

While they are a small-sized breed, French Bulldogs are muscular with solid bones.

Sensitive Digestion

Digestive issues and flatulence are common in French Bulldogs. Providing a diet with adequate fiber content helps support sensitive stomachs and stool quality.

GIVE THEM NUTRITION AS UNIQUE AS THEY ARE

ROYAL CANIN® French Bulldog Adult and Puppy formulas offer tailored nutrition in custom kibble, made just for your French Bulldog.

ROYAL CANIN FRENCH BULLDOG

From puppyhood to adulthood, Royal Canin offers tailored nutrition with an exclusive kibble design made just for your French Bulldog's breed and growth stage needs.

French Bulldog Puppy

For French Bulldog puppies from 8 weeks up to 12 months old.

IMMUNE SYSTEM SUPPORT

A puppy's immune system develops gradually. FRENCH BULLDOG PUPPY helps support your puppy's natural defenses with an exclusive complex of antioxidants, including vitamin E.

DIGESTIVE HEALTH

Formulated with high-quality protein (L.I.P.*) and prebiotics to support digestive health and a balanced intestinal flora, contributing to optimal stool quality.

HEALTHY SKIN

FRENCH BULLDOG PUPPY helps support the skin's role as a barrier with an exclusive complex of nutrients, including EPA and DHA, and helps maintain skin and coat health.

French Bulldog Adult

For French Bulldogs 12 months and older.

MUSCLE MASS CONDITION

FRENCH BULLDOG ADULT helps maintain muscle mass with an appropriate protein content (24% minimum). Enriched with L-carnitine.

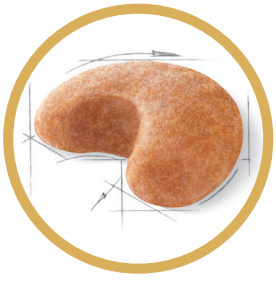

HEALTHY SKIN

The skin reflects the dog's state of health, and nutrition plays a key role in its maintenance. The FRENCH BULLDOG ADULT formula helps support the skin's role as a barrier with an exclusive complex of nutrients and helps maintain skin health with EPA and DHA.

ODOR REDUCTION

This formula helps to reduce intestinal fermentation, which can cause digestive disorders, flatulence and bad stool odor. FRENCH BULLDOG ADULT helps support healthy digestion with highly digestible proteins (L.I.P.*), an appropriate fiber content and high-quality carbohydrate sources.

* Protein selected for its very high digestibility.

EXCLUSIVE KIBBLE DESIGN

The French Bulldog is a good example of the brachycephalic jaw type with a very short muzzle. FRENCH BULLDOG ADULT & PUPPY kibbles are designed exclusively to make it easy for the breed to pick up and to encourage him to chew.
