

**SAFETY INSTRUCTION FOR PRE-LIT  
CHRISTMAS TREE**

**ASSEMBLY .....**

1. Before you start to assemble your tree, choose a location near a wall outlet.  
Place the tree stand on a level surface.

2. Carefully insert the bottom section of the tree pole into the stand.  
Make sure pole is firmly inserted into stand and screws tightened.  
Then insert middle section into bottom and top into middle.

3. Allow branches to fall into place or gently pull up and out. When adjusting branches be sure that all wires are free of branches hinges.

4. Shape the branches. Start with tips farthest from the pole, one to the right, one to the left and one at the center of the main stem.

5. After shaping the whole tree following the previous steps, step back and take an overall look at the tree, shift branches to fill any gaps. Slightly upsweep all branch tips for uniform look. Your tree is now ready to decorate and enjoy.

6. Now locate the long extension cord and plug it into the wall outlet. Then plug in middle extension cord into the bottom extension cord. Lastly, plug in the light set from the top into the middle. As shown in diagram, and now your tree should be completed with all lights illuminated.

### STORAGE

1. Unplug extension cord from the wall outlet.
2. Unplug each section of extension cord, keep each stack of light sets connected together.
3. Gently lift off the top and middle sections, and remove the bottom section from the tree stand.
4. Carefully replace the tree in its box and tape it shut, store box in a cool dry place where the temperature does not exceed 100°F.
