

# Handheld Sprayer Instructions

## OPERATING INSTRUCTIONS

Please read all of the following instructions and cautions completely before operating this sprayer.

1. Wear eye protection when spraying.
2. Avoid contact with spray and spray solutions.
3. Do not put heated or self-heating solutions into the sprayer.
4. Inspect sprayer before each use. If any component of the sprayer shows signs of deterioration or damage, replace it before using the sprayer.
5. Leave room in tank for head of air.
6. Release pressure if you interrupt spraying.
7. Carefully read the labels on the chemicals you will be using with this sprayer. Make sure you understand what the instructions mean before you use the chemicals. Also be sure this sprayer is the proper tool to use with the chemicals you will be spraying.

Use and maintenance:

1. Remove pump from tank by turning counter-clockwise.
2. Prepare spray solution following manufacturer's recommended mixing instructions. Fill tank to desired level.
3. Close tank by inserting pump assembly through opening. Turn cap clockwise until pump is sealed tightly into the tank.
4. When your sprayer is filled, pump handle to pressurize tank. As pressure drops during use, repressurize tank.
5. Depress trigger lever for discharge.
6. For fine spray, turn nozzle cap IN. For stream, turn cap OUT.
7. Clean sprayer after every spraying. Flush thoroughly with clear water to remove all spray materials. Remove pump and hang up separately.
8. Pump works easier and pumps faster if you apply petroleum jelly to the plunger cup occasionally.
