Buck Stove Vent-Free Fireplace Systems...

Add the warmth, charm and beauty of a fireplace to almost any room in your home. Vent-Free units require no chimney or venting system. No heat is lost, and installation is quick and easy. Buck Stove Vent-Free fireplaces are 99.9% fuel efficient. The unit does not require electricity to provide heat, making them the perfect alternative for emergency heat during power outages. Safety is a top priority with every Buck Stove Vent-Free Fireplace. All units are design certified and meet or exceed all regulations and safety program standards. Additionally, these units offer the dual function safety pilot system which protects against oxygen depletion and interruption in fuel supply. Available in Natural and LP Gas.

Model 34ZC

The Model 34 ZC is our most popular vent-free Fireplace providing up to 33,000 BTU's of clean heat. Standard features include factory installed variable speed blower and thermostatically controlled gas which modulates to maintain desired heat output. Optional Millivolt gas valve for use with remote control or wall thermostat. Choose from numerous installation options to fit every need. Model 34ZC can be used as a masonry fireplace insert, freestanding with optional mantel or this unit can be built into existing wall for zero clearance application.

Shown with firebox cover doors, black satin finish, pewter knobs. Optional mantel styles and colors available.
