

DEEPER ROOTS

Prevent hillside erosion & uprooting

DIRECT NUTRIENTS

Deliver water, oxygen & fertilizer to roots

DEEP DRIP® WATERING STAKES

MULTIPLE SIZES

Variety of stake sizes work with more plants

FOR EVERY PLANT

For struggling, new or established plants

HOW IT WORKS

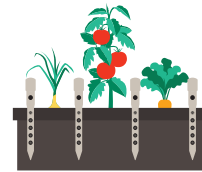

Plant roots will grow towards where they find water. DEEP DRIP® stakes release water deep into the soil, encouraging roots to grow further underground, instead of a shallow surface water source. Deep root watering leads to healthier, stronger, deeper roots and plants

Deep seated roots help to prevent uprooting, erosion & damage to structures from shallow roots. DEEP DRIP® stakes also help during droughts by preventing water loss & waste.

Save up to 50% of Outdoor Water Use by:

- cutting watering time in half or more
- preventing wasteful evaporation & run-off
- reaching deep "feeder" roots faster

8" DEEP DRIP® WATERING STAKE

Small Garden Plants:
Flowers, Fruits & Vegetables

14" DEEP DRIP® WATERING STAKE

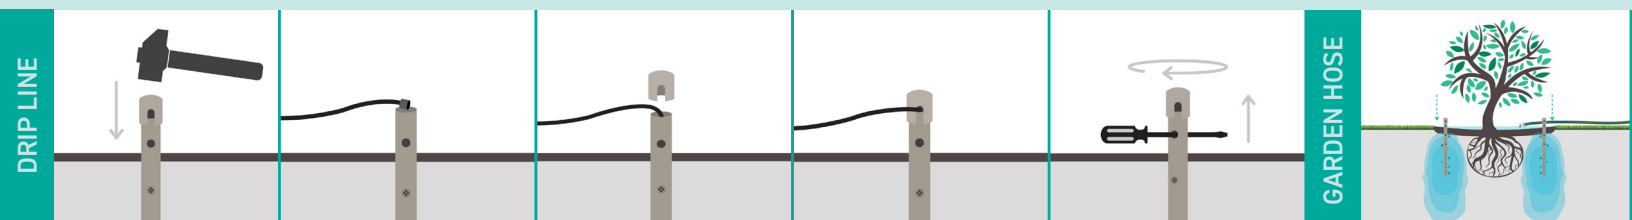

Shallow Root Plants:
Shrubs, Vines, Potted Plants & Ornamental Trees

24" DEEP DRIP® WATERING STAKE
