## ADDITIONAL TOOLS (Not Provided)

Note: It is not recommended to use power tools during assembly.

Phillips Head Screwdriver

Note: Wood dowels are intended for alignment. Additional clearance between wood dowel and pre-drilled hole is intentional for ease of assembly.

Step 1. Attach knobs (part #11) to door panels (parts G & H) using round head bolts (part #12) and phillips head screwdriver. Attach double magnet (part #6) to top panel (part A) using round head screws (part #7) and phillips head screwdriver.

Step 2. Attach back panel (part E) to right panel (part C) using wood dowels (part #5), long bolts (part #1), spring washers (part #3), flat washers (part #4) and allen wrench (part #13).

Step 3. Attach left panel (part B) to back panel (part E) using wood dowels (part #5), long bolts (part #1), spring washers (part #3), flat washers (part #4) and allen wrench (part #13).

Step 5. Attach bottom panel (part D) to assembled unit (parts B, C & E) using wood dowels (part #5), long bolts (part #1), spring washers (part #3), flat washers (part #4) and allen wrench (part #13).

Step 6. Carefully turn unit upright. Attach door panels (parts G & H) by placing bottom pin hinge (pre-installed in door) in the pre-drilled hole of bottom panel (part D). Then depress the top spring-loaded pin hinge so it can be placed in the pre-drilled hole of top panel (part A).

Note: Be sure top and bottom pin hinges are fully extended to secure doors in place.

Step 7. Place shelf holders (part #8) into desired position and then slide adjustable shelves (part F2) into place.

Step 8. Drill three 11/32" holes in the wall and tap wall anchors (part #9) in to the drilled holes. Secure support plate (part I) to wall anchors (part #9) using long screws (part #10) and phillips head screwdriver.
