- Low RPM, low AMP draw motors with solid copper windings for longer life
- Silent Air low RPM, 2 cylinder commercial grade pumps plus heavy gauge steel cylinders, cylinder heads and valves.
- Commercial Grade Engineered components - pressure switches, stainless steel transfer tubes, brass quick couplers, gate valve tank drains, combined with heavy gauge steel construction for maximum durability & reliability.

Model HI05V080Y1S
5HP, 80 Gallon, Silent

Model HI05V080Y1
5HP, 80 Gallon

Designed to Perform, Built to Last

- ✓ The Whisper 100 noise suppression system dissipates noise up to 25%
- ✓ Heavy steel OSHA approved belt guards
- ✓ Solid Steel Connecting Rods
- ✓ Dual 2B Style Industrial Grade Drive Belts
- ✓ Easy drain valves on pump & tank
- ✓ Low RPM, 2 Stage pumps make HULK Compressors operate slower, quieter & cooler
- ✓ 4 Year Full Warranty
- ✓ Built in the USA

Weight	558 lbs	485 lbs

Our Customers Say It Best

I absolutely love it. I wanted something to run my air tools and this unit performs. I did a ton of research before choosing this and I couldn't find anything that puts out equal cfm anywhere close to this price point. The fact that it's SUPER quiet is just the cherry on top.

About HULK by EMAX

HULK Air Compressors & Air Tools deliver overwhelming performance to ensure that they meet the needs of even the most demanding environments. All products are designed with exacting tolerance and specifications to deliver all the power that's needed at the job site, garage or shop, for extreme performance.

HULK silent air compressors are designed to deliver high air power output with little noise. These commercial-grade pumps are designed with heavy gauge steel cylinders, cylinder head and valves for maximum durability and reliability.

Available from online retailers, nationwide.
