

Aerosol Bombs

EASY-TO-USE AEROSOLS

EverCalm, RuttingBuck, and Certified In Heat are now available in aerosol scent bombs! They can be dispensed in bursts which allows you to control how much scent is released at one time. You can also dispense the entire canister at one time allowing you to fill your entire hunting area.

The nozzle atomizes the scent as it is released into your hunting area. This helps the scent naturally stick to the vegetation in your hunting environment so you can leave active scent trails.
