HYDRANGEA CANDELABRA® 4" POTTED ROCKETLINERS®

Rocketliners® are sized, shaped and rooted throughout the pot with strong and responsive roots. Gardeners can expect a finished healthy plant within a single growing season. They have greater fresh root mass and vertical root training which promotes faster finishing times. While it can often take up to 3 years for a shrub or vine to get fully established growing from bareroot, Rocketliners® may only take 12 months, saving you up to 2 seasons of waiting time. Rocketliners® are for gardeners that have busy lives, little time to waste and want to start out with the best planting stock.

About This Variety: Candelabra® (Hydrangea paniculata 'Hpopr013' USPP27472) from Bloomin' Easy® is an ornamental deciduous shrub unrivaled in the shrub world. Desired for their splendid, abundant and showy flower clusters. This award-winning variety features candle-shaped flowers that bloom creamy white, transitioning to bright red as summer fades. Sturdy stems carry the blooms high and provide winter attraction. Excellent as a feature plant, in mixed borders or larger patio containers.

Growing Instructions: Dig a hole two times the width of the Liner pot. Set top of root ball even with ground level. Combine planting mix and garden soil. Fill to ground level and tamp down firmly. Water to settle soil. Add layer of mulch to retain moisture and discourage weeds. Water regularly for the first year, then as needed once established. Feed with a quality fertilizer following application and frequency instructions, typically just before and during the bloom season.

Care Tip: Prune to desired height in early spring before flower buds form to enjoy large, impressive blooms in summer.
