SPIRAEA SNOWMOUND 4" POTTED ROCKETLINERS®

Rocketliners® are sized, shaped and rooted throughout the pot with strong and responsive roots. Gardeners can expect a finished healthy plant within a single growing season. They have greater fresh root mass and vertical root training which promotes faster finishing times. While it can often take up to 3 years for a shrub or vine to get fully established growing from bareroot, Rocketliners® may only take 12 months, saving you up to 2 seasons of waiting time. Rocketliners® are for gardeners that have busy lives, little time to waste and want to start out with the best planting stock.

*profuse bloomer*

*blue tinged leaves*

*shrubs are the  
cornerstone of landscapes*

*About This Variety:* Spiraea nipponicum 'Snowmound' is a deciduous shrub, which is vase-shaped with substantial branching that arches gracefully to the ground and is noted for its showy spring bloom. Also known as bridal wreath. Snowmound features small, blue tinged leaves on arching branches with pure white flowers. A profuse bloomer on previous year's wood, so prune right after flowering. Will do well in just about any garden soil.

*Growing Instructions:* Dig a hole two times the width of the Liner pot. Set top of root ball even with ground level. Combine planting mix and garden soil. Fill to ground level and tamp down firmly. Water to settle soil. Add layer of mulch to retain moisture and discourage weeds. Water regularly for the first year, then as needed once established. Feed with a quality fertilizer following application and frequency instructions, typically just before and during the bloom season.

*Care Tip:* Prune after blooming for best flower set the following year.

*Exposure:* full sun

*Height:* grows 36" tall

*Spacing:* plant 36" apart, setting root ball even with ground level

*USDA Zones:* hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
