

RIGHT NOW® EMERALD 6 (SC)

This mineral is designed to be fed to beef cattle on green, growing (vegetative) spring or summer pastures.

GUARANTEED ANALYSIS:

Calcium.....Min.	14.0 %	Max.	16.8 %
Phosphorus.....Min.	6.0 %		
Salt.....Min.	17.3 %	Max.	20.7 %
Magnesium.....Min.	2.5 %		
Potassium.....Min.	0.1 %		
Copper.....Min.	2,500	ppm	
Iodine.....Min.	250	ppm	
Selenium.....Min.	26.4	ppm	
Zinc.....Min.	7,000	ppm	
Vitamin A.....Min.	200,000	IU/LB	
Vitamin D3.....Min.	20,000	IU/LB	
Vitamin E.....Min.	200	IU/LB	

INGREDIENTS:

Calcium Carbonate, Salt, Dicalcium Phosphate, Monocalcium Phosphate, Magnesium Oxide, Molasses Products, Soybean Oil, Sodium Selenite, Vitamin E Supplement, Vitamin A Supplement, FD & C Blue No. 1, Vitamin D3 Supplement, Zinc Sulfate, Manganese Sulfate, Basic Copper Chloride, Ethylenediamine Dihydroiodide, Cobalt Carbonate, Mineral Oil, Natural and Artificial Flavors Added.

FEEDING DIRECTIONS: Feed Right Now Emerald 6 free-choice to beef cattle on green, growing (vegetative) spring or summer pastures. Average consumption should not exceed 4 oz of Right Now Emerald 6 per head daily so as not to exceed the maximum allowable selenium intake of 3 mg per head per day. Provide fresh, clean water at all times. Allow at least one linear foot of feeder space for each 100 head of cattle. Do not allow sheep, or similar animals with a low tolerance to copper, access to Right Now Emerald 6.

When introducing Right Now Emerald 6 to cattle, it may be necessary to limit its intake for the first 2 to 3 weeks. Intake may be controlled by repositioning the feeder in either high or low traffic areas. To decrease consumption, move the feeder further away from water, loafing or shady areas. If repositioning the mineral feeder is not possible, or does not produce the desired results, granular or block salt may be offered in a separate feeder placed adjacent to the mineral feeder. Control the salt allocation to achieve target mineral consumption. Do not dilute Right Now Emerald 6 by mixing with salt as this will compromise the weatherization features of this mineral.

Right Now Emerald 6 is a Superior All-Weather® Technology mineral, formulated to resist clumping caused by rain and humidity while significantly reducing mineral loss from the feeder due to wind.

Cargill Animal Nutrition does not use restricted-use protein products in any of their livestock feeds and is in compliance with FDA and state requirements regarding the use, handling and storage of restricted-use protein products.
