POOL PAINT PRODUCT

One Component Swimming Pool Paint

Bare Ground's new high performance one component swimming pool paint is formulated with a top of the line chlorinated rubber that provides excellent chemical, abrasion, UV light, algae and fungus resistance. It is designed to be applied to fresh water, chlorinated or salt water pool surface areas including the coping. Rubber pool paint can be applied over bare concrete surfaces or on surfaces that were previously painted with acrylics. Bare Ground new P-Paint rejuvenates, beautifies and protects a wide variety of pool substrates including concrete, plaster, gunite and masonry. Bare Ground P-Paint resists chipping and peeling. It has a rapid cure and dries to a smooth glossy finish in as little as 2 hours. Coverage is 300 sq. ft. per gallon. We recommend 2 coats for optimum performance.

Color: White

Available in one (1) Gallon containers

CAL PLUS PRODUCTS

Calcium Increase for Swimming Pools

Brings pool water to a normal calcium hardness level to prevent corrosion, etching and pitting of concrete surfaces. Protects damage to pool equipment caused by "soft water". Scatters easily over the surface for quick and easy dissolving.
