STEP

## Slimline Light Aluminum Step Stool

### OPERATION INSTRUCTIONS

#### OPENING STEP STOOL

1. Remove protective packaging.
2. Position step stool so the climbing treads are facing operator and insure there is enough room behind the step stool to fully open step stool.
3. Position right hand in the center of the step stool handle and left hand on top of the large platform until platform is horizontal.
4. Set step stool on a sturdy, level, and dry surface before climbing.

#### CAUTION

To avoid injury: take care when climbing, standing, and reaching. Use with both feet securely on top step and never overreach. Never use on uneven, slippery or greasy surfaces. Do not use if parts are loose, missing, or worn. Inspect periodically according to usage. Replace the step stool if damaged.

#### CLOSING STEP STOOL

1. Position step stool facing the operator.
2. Place left hand toward the back of the top platform.
3. Place right hand centered on top of handrail.
4. Fold the top step by lifting the back of the top platform until step is fully vertical in its storable position.
5. The step stool is now ready to be stored.

#### PLEASE READ

- **DO NOT stand on handle**
- **DO NOT sit on handle**

#### CARE AND MAINTENANCE

For consistent, smooth operation, keep step stool clean of any debris. Remove paint or any other substance that may adhere to the stiles. Store step stool in clean dry location.
