actual model may vary

Tripod Set Up

Spread the tripod legs and set the tripod on a firm support.

Mounting

1. Position the mounting plate onto the mounting platform of the spotting scope then tighten mounting screw located under the mounting plate to firmly lock spotting scope body onto the mounting plate.
2. Make sure screws are locked/tight and the tripod is on a stable surface.

Viewing

1. With spotting scope mounted securely in place, point the objective lens at the object. Take the cover off objective lens and remove the lens cap off the eyepiece.
2. Rotate the zoom ring of the eyepiece to the lowest magnification.
3. Look into the eyepiece, then turn the focus knob to focus object clearly.
4. Use the Pan and Tilt Control Handle to slowly move, pan, and tilt to desired position.

Spotting Scope Care

- Store your spotting scope with the protective lens caps in a cool and moisture free environment.
- To clean the lenses, use a soft bristle brush to remove any dust or dirt and then use a soft cloth moisture with alcohol. Wipe lenses from center outward and avoid touching the lens, as fingerprints will smear the lens.
- To clean body parts, use a soft cloth with warm water and mild soap to remove dirt.
- Do not dismantle the spotting scope or the eyepiece. If they need repair or adjustment, please contact BARSKA customer service.

Tripod Care

- When not in use, compress tripod legs.
- Store your tripod in a cool dry area.
