

# STAINLESS STEEL SWING SPINNER

## 360° STAINLESS STEEL SWING SPINNER

- Safety rated to 2000 lbs.
- Allows for 360-degree rotation in a clockwise or counterclockwise direction
- Quick, sturdy and durable assembly to any single point hanging swing
- Rounded edges create a safe attachment to any carabiner, spring clip, tree strap, rope, or chain
- Quality corrosion-resistant 304 stainless steel construction

**SAFER. BETTER. STRONGER.**

**CONNECTING STAINLESS STEEL SWING  
SPINNER TO A M&M TREE STRAP?**

*See proper installation instructions on back side.*

## INSTALLATION INSTRUCTIONS

1. Find your spot. Locate beam, playground, or healthy horizontal tree branch (branch should be a minimum 8" in diameter). **WARNING:** Avoid any strap edges or abrasive contact with strap to maximize life and function of strap. Area surrounding hanging site should be clear of obstacles and over flat, soft terrain.
2. Wrap tree strap around healthy sturdy branch or other object and pass Stainless Steel Swing Spinner end through the other loop end. The excess strap should hang from the underside of the branch. **(A)**
3. To adjust the height of the strap continue to wrap the strap around the tree branch and through the loop multiple times until desired length is achieved **(B)** or create loop with the center of the strap and pull both ends through **(C)**. Pull strap tightly to secure against branch.
4. Attach your swing securely to Stainless Steel Swing Spinner using optional carabiner or by attaching swing hanging hardware directly to the lower portion of spinner.

### IMPORTANT

- Check your Stainless Steel Swing Spinner frequently for signs of wear. If any part of the kit is worn down, do not use.
- Tree strap safely supports maximum weight of 800 lbs.
