

Thank you for choosing Sunnydaze Decor. We stand behind our brand and the quality of the items we sell. Replacement parts or products will be sent at our discretion, within the one-year warranty period. Proof of purchase, with the date of purchase as well as photos of the defective merchandise, must be provided.

If you have any questions, comments or concerns please feel free to contact us by phone at: **888-881-4668**. You may also contact us by email: customerservice@serenityhealth.com, or via our webpage at: www.serenityhealth.com/contact-us/

DW-513

Step 1) Take power cord from back of fountain, and plug into transformer.

Step 2) Close the opening in the back of the fountain with the included panel.
The power cord will fit in the notch of the panel.

Step 3) Pour water into the bottom of the fountain (recommend about 20 ounces),
making sure the pump is fully submerged.

Step 4) Plug the power cord into a power outlet.

Note: When plugged in for the first time, there may be air in the pump. It may take several minutes until all of the air escapes and water begins to flow.

SAFETY GUIDELINES:

1. Read all instructions and safety guidelines thoroughly. Failure to follow guidelines and instructions could result in serious injury and/or property damage.
2. Do not pump flammable liquids such as gasoline / fuel oil with the fountain pump.
3. Make sure the water tube is properly connected with the pump. Do not crimp the tube as this could cause a blockage and water will not flow.
4. During operation, the pump will be submerged in water. Take care when handling the pump; do not pull it out of the water by the power cord, and do not move it when running and still submerged in water.
5. Unplug the pump from electric power before servicing, cleaning, or moving.

CLEANING AND MAINTENANCE:

1. Check water level at the pump location regularly. The pump must be fully submerged with water to avoid damage to the pump.
2. If, after time, the pump starts to lose power or stops working, check for the buildup of sediment or scale in the Fountain Basin.
3. Remove the impediment or any dirt and scale.
4. Periodically change water and keep water clean. Distilled water is recommended to prevent mineral buildup. This will improve the waterfall effect.
