

★ Industry Leading Innovation ★
X29 Brad Point Drill Bit
Faster. Cleaner. Longer life.

CNC Machined High Speed Steel

Concentric from tip to shank for precise hole accuracy

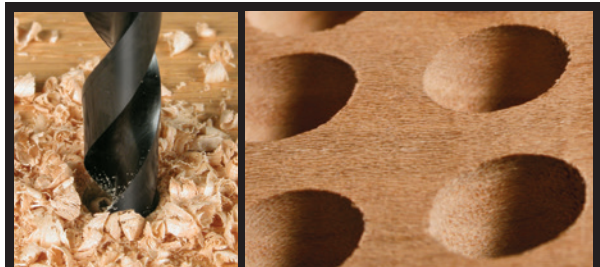

Dihedral point geometry to drill fast, clean, accurate sized holes

Task specific flute geometry for optimal chip evacuation

Black oxide finish prevents dulling and resists corrosion

Benefits:

- Industry leading speed reducing cycle times
- Exceptionally clean holes
- Truer, accurate hole diameter
- Optimum chip evacuation
- Unrivaled hole quality from entry to exit
- Extended life reduces cost per hole
- Generates minimal heat and material burn
- High heat dissipation for extended life and safer tool handling

Comparative Testing

- 10X Faster than other "premium" branded brad point drill bits
- Our premium is based on quality and performance

	1/2" Bit	1050 RPM	2" Thick Walnut

1.8	20.3	21.4	12.1		

Drilling time in seconds with constant load.

Drills 10X Faster | **Cleaner Hole Quality** | **Longer Life**

versus competitive "premium" branded brad point drill bits

Point Style: X29 Dihedral Brad Point
Material: High Speed Steel
Applications: For drilling clean accurate holes in hardwood, plastics, nylon, fiberglass and most man-made materials.
