Bigger is better

Compared to other Bluetooth lock boxes, the Smart Keybox 3 comes with much more interior storage space to hold house keys, access and transport cards, and even car key fobs for safe and easy handovers.

Versatility for your convenience

With two interchangeable shackle sizes, the Keybox is optimised for shackling on door knobs, handles and even fences. Alternatively, you can also mount it on walls or firm structures.

Your 24/7 reception

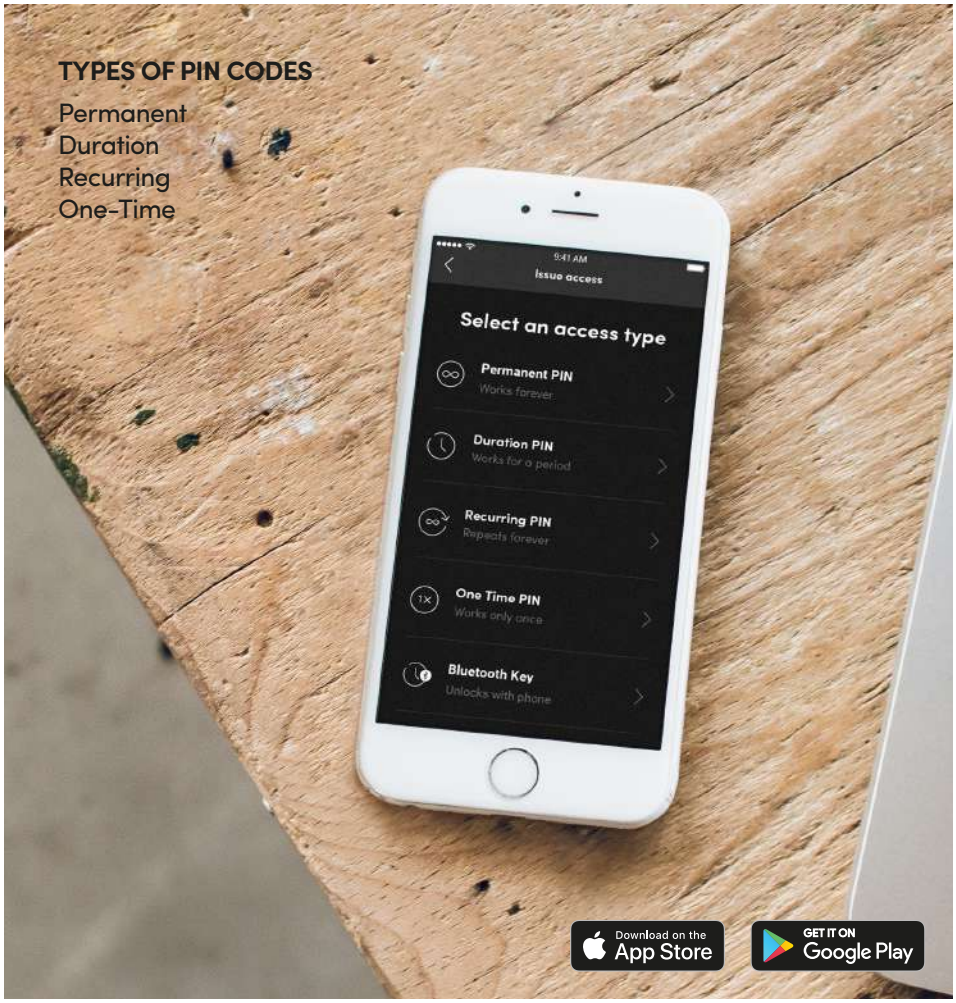
Let guests in any time of the day, even when you're miles away! The igloohome mobile app lets you manage access in the palm of your hands.

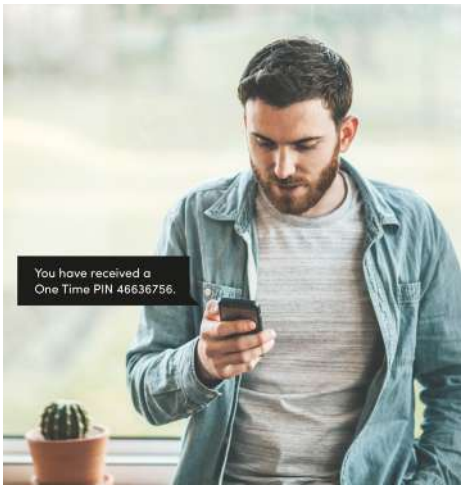
There's no need for users to download an app to receive PIN codes, or for you to be near the Keybox to grant access. You can simply send Bluetooth keys to track activity logs in real-time.*

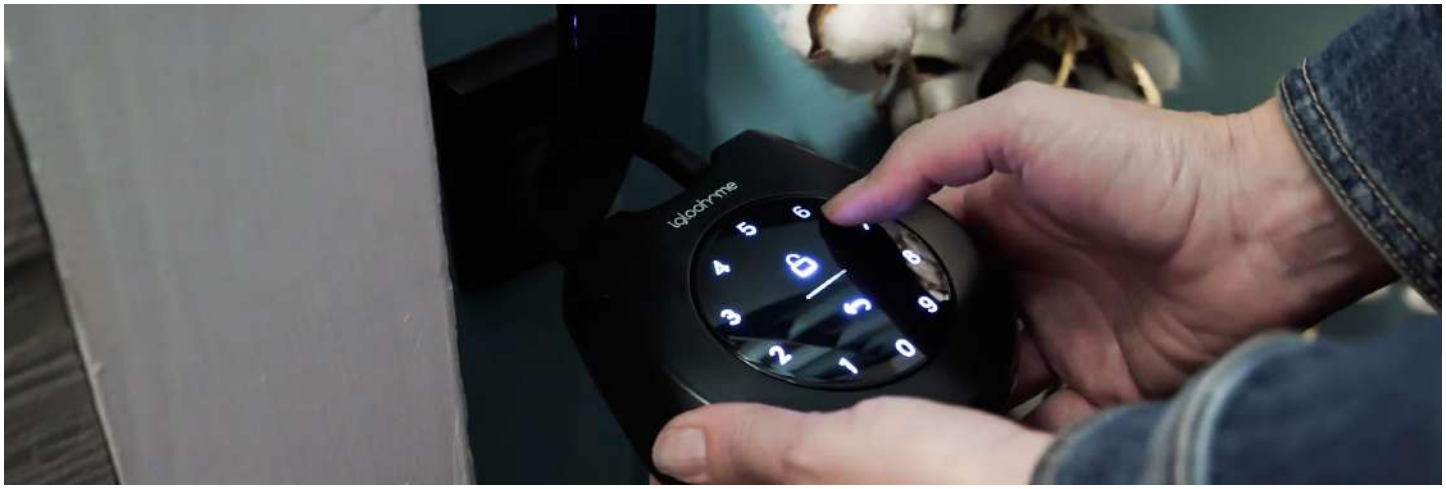
**Note: PIN code activity logs are updated when you sync the lock via Bluetooth.*

Syncs with Airbnb

Easily connect your Airbnb account via the igloohome app to automatically create and send PIN codes for each guest according to your listings.







Fuss-free sharing experience for everyone

Instant access request
Scan the QR code to request for access instantly.

Airbnb integration
Automatic generation of PIN codes for each booking.

Intuitive keypad interface
Optimum clarity in both day and night settings.

Tri-coloured LED status indicator
Enhanced user experience with clear status indicators.

Designed to keep your keys safe

Internal pocket design
Holds your assets securely in place.

Enhanced durability
Made with heavy-duty materials for durability and strength.

Hardened shackle
Made with hardened stainless steel and anti-corrosion materials.

Auto relock
Keybox automatically relocks once it is shut.

Security for greater peace of mind

Low battery alert
Prompts you intuitively to replace the batteries before they run out.

Keypad security lockout
Keypad is disabled after several incorrect PIN code attempts.

Masking security code
Conceal your actual PIN code by entering random digits before it.

Relock reminder alert
Alerts you when you forget to close the Keybox.
