

TOOLS THAT TAKE ON ANYTHING

Hultafors

The performance you need to get the job done – faster, safer, smarter.

This year, we’re introducing Hultafors Tools Work Gear – a comprehensive line of durable tool carriers, functional work gear, and comfortable kneepads. All products are designed with professionals in mind and are ready to go wherever you go.

Ask any tradesman on the job. They’ll tell you – “If you want the real deal, it has to be Hultafors.” We’re proud to offer the tools and work gear that give professionals the best possible functionality, precision, and quality.

Starting with the world-renowned folding rule in 1883, we have spent 130 years developing and manufacturing tools for professionals. Our products are developed in cooperation with professional users, and precision-engineered to make the workday as smooth and efficient as possible.

When you invest in Hultafors Tools you will have long-lasting, durable tools and work gear designed with efficiency that also minimizes the impact on our environment.

We make tools and work gear you can rely on in all situations, every day. We hope you enjoy finding exactly what you need to get the job done right.

Tool carriers.

Organize like a pro.

COMPLETE LINE OF TOOL BAGS.

Keeping everyday tools safe and accessible is the key to jobsite efficiency. We offer a complete line of tool carriers with plenty of storage options for keeping gear stowed away properly and safely while being lightweight for easy toting. Each tool carrier is strategically designed with optimal pocket count and organizational straps to ensure the safety of your tools and accessories. Constructed with durable materials to withstand the roughest of jobsites, we offer a wide selection of tool carriers for a variety applications.

OPEN TOP TOOL CARRIER

Superior visibility with the collapsible bar handle, open tool carrier.

Collapsible metal handle bar with molded grip for easy carrying.

Heavy-duty and ballistic polyester fabric construction.

Adjustable non-slip padded shoulder strap.

Durably Designed Tool Carriers.

PROMOTING EFFICIENCY.

Promoting on-the-job efficiency, Hultafors Tools soft sided tool bags are designed for the trade professional. We revolutionized tool storage and organization for the trades. As the most versatile and durable tool carriers in the industry, our products are the reliable choice. Made from ballistic polyester, each tool carrier is durably designed to withstand jobsite abuse.

Form Meets Function.

FEATURES WITH A PURPOSE.

With functionality in mind, all tool carriers have designated interior and exterior pockets to ensure needed tools and accessories are easily accessible. With an optimized pocket count, Hultafors tool bags keep tradesmen organized and efficient. Key features include a designated level cradle, metal tape clip, electrical tape holders, and a collapsible metal handle bar.

Molded Base Tool Backpack

Model #HT5535

Durably designed for longer wear, this Heavy-Duty Molded Base Tool Backpack is constructed with ballistic polyester and a molded base for longevity.

- Constructed from heavy-duty ballistic polyester fabric for increased durability.
- Molded base provides a flat surface to stand the backpack upright and keep your tools dry and safe while soft enough to be comfortable on your back.
- Main back zippered compartment has padded pockets for laptop, tablet and charging accessories.
- 3 Large foam back pads for extra comfort.
- Adjustable padded shoulder straps with slip-resistant material and 2-way adjustable sternum strap.
- Ergonomic silicone rubber carrying handles with webbing supports heavy loads.
- Heavy zippers and large, ergonomic metal zipper pullers.

THE TRADESMAN’S BEST FRIEND.

The red ends, the blond downy birch and the characteristic smoothness of the joints. Originating from 1883, our classic folding rule has long since reached legendary status. We are continuously developing new versions of our folding rules with the ambition to be the tradesman’s best friend for a long time.

FOLDING RULE 61.2.10
61” long. Made from carefully selected Swedish birch wood.

Iconic through and through.

THE DETAILS MAKE THE DIFFERENCE.

Hultafor invented its classic folding rule more than 130 years ago, and we are proud that this iconic measuring instrument remains the first choice for professionals. It's the attention to detail that sets it apart. Constructed from hand-picked downy birch wood, with high quality joints made from Swedish steel and an eco-friendly protective coating, Hultafor folding rules provide superior flexibility and durability that generations of tradesmen have attested to. A professional can always tell.

Accurate measurement.

MANUFACTURED TO STRINGENT REQUIREMENTS.

All our folding rules are calibrated to the very highest levels of accuracy. Our manufacturing process is governed by a quality system certified in accordance with ISO 9001. Throughout the production process, each strip is photographed twice by high speed cameras and closely inspected three times by experienced staff. This ensures that no birch strip shows signs of anything but excellent wood and to inspect that every printed scale is clear and exact.

Folding Rule 61-2-10

Classic 61” folding rule manufactured from downy birch with Swedish steel joints, affording thin sections and great flexibility. Scale with black figures on both sides, metric along the bottom edge and inches along the top edge.

Model #100504U

- Coated with a water-based protective lacquer for increased resistance to dirt and moisture.
- Thin contact surfaces make it easy to use in narrow spaces.
- Contact side lays flat for easy measurements.
- Rule can be folded to the required length.

Folding Rule 78-2-12

Classic 78” folding rule manufactured from downy birch with Swedish steel joints, enabling thin sections and great flexibility. Traditional 1/16” scale with black and red markings.

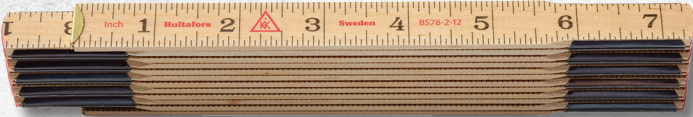

Model #101404U

- Scale on both sides with red stud center markings every 16 inches.
- Coated with a water-based protective lacquer for increased resistance to dirt and moisture.
- The joints are heat-treated, coated and oiled at three points to ensure first-class performance.
- Each folding rule is run through inspection to ensure accuracy.

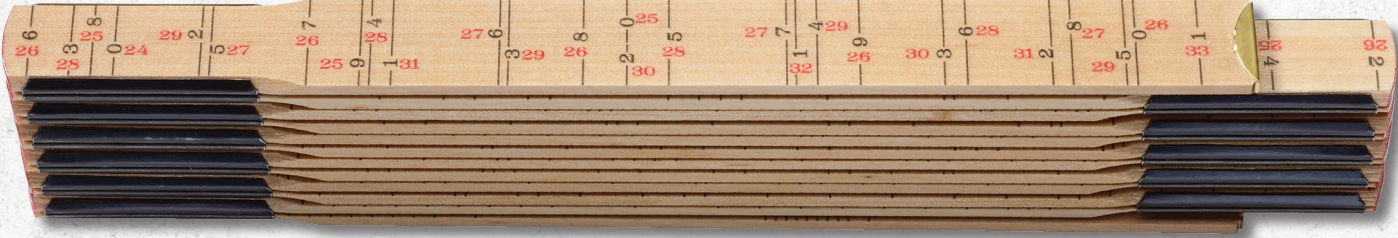

Brickspacing Rule BS 78-2-12

78” folding rule manufactured from downy birch with Swedish steel joints, enabling thin sections and great flexibility. Brick Masons wood rule for spacing brick courses and a traditional 1/16” scale with black and red markings.

Model #101304U

- Brick masons scale on the inside lays flat and features red markings for number of courses.
- Coated with a water-based protective lacquer for increased resistance to dirt and moisture.
- The joints are heat-treated, coated and oiled at three points to ensure first-class performance.
- Each folding rule is run through inspection to ensure accuracy.

Shown: 101304U with brick masons scale on the inside.

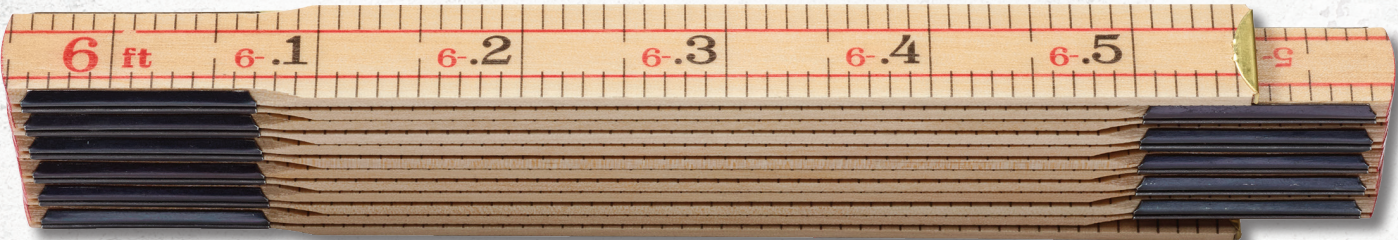

Engineering Folding Rule E 66-2-12

66” folding rule manufactured from downy birch with Swedish steel joints, enabling thin sections and great flexibility. Engineering scale with 1/10” and 1/100” of a foot and a traditional 1/16” scale with black and red markings.

Model #101204U

- Engineering scale on the inside and inches scale on the outside.
- Coated with a water-based protective lacquer for increased resistance to dirt and moisture.
- The joints are heat-treated, coated and oiled at three points to ensure first-class performance.
- Each folding rule is run through inspection to ensure accuracy.

Shown: 101204U with engineering scale on the inside.

Sharp tools, precise marks.

THE NEXT GENERATION OF MARKERS.

Hultafors range of marking tools consists of both traditional carpenter pencils and the next generation of tools for marking. Our products are developed together with professionals and are designed for making your workday more efficient, no matter what material you are dealing with.

DRY MARKER

Grip-friendly pencil in holster with built-in sharpener for clear markings.

A new classic.

SHARP PENCIL, PRECISE MARKS.

At Hultafors, we pride ourselves on attention to detail. Our Dry Marker combines the shape of the traditional carpenter's pencil with the classic school pencil, so you can both draw rough lines and make precision marks. The design of the holster with a built-in sharpener makes the pencil easy to sharpen so that you always have a sharp tip close at hand.

Need a refill?

GRAPHITE OR CHALK.

The design of the refill extends the life of the Hultafors Dry Marker. The Dry Marker refill comes with 10 leads for marking on all types of surfaces. The container protects the leads during transport and only ejects one lead at a time. The refill is available in graphite, graphite and colored chalk, and colored chalk combinations.

Dry Marker HDM

Model #650100

Grip-friendly pencil in holster for clear markings. The shape of the holster ensures that the pen stays in place even when you move. Accessible sharpener in the holster keeps dirt and moisture away from the pen for longer durability.

- Grip-friendly and ergonomic design.
- Roll stop on both pencil and holster.
- Sharp and accessible sharpener placed in the holster.
- Optimized lead for durability and resistance to moisture.
- Refill available with 10 leads in a smart container.
- Easy to change lead.

Dry Marker Refill

Model #650110

Hultafors Dry Marker Refills can be attached with a clip in a pocket or tool bag. The design of the container protects the leads during transport. The refill is available in eight combinations for all your marking needs.

- Refill with 10 leads for use with the Dry Marker HDM.
- Smart container design protects leads.
- Ejects one lead at a time.
- Three variants: graphite, graphite and chalk or chalk.
- Graphite leads are optimized for increased durability and resistance to moisture.

Reaching a new level.

WHEN YOU NEED TOP LEVEL ACCURACY.

For professional tradesmen, a great spirit level is a vital tool for a job well done. Our spirit levels feature vials made from tough plastic that have a high level of transparency and durability. The fluid inside is a low viscosity oil mixture that is resistant to temperature fluctuations, ultraviolet light and static electricity. To guarantee accuracy, all our spirit levels are manufactured in accordance with a quality system compliant with ISO 9001.

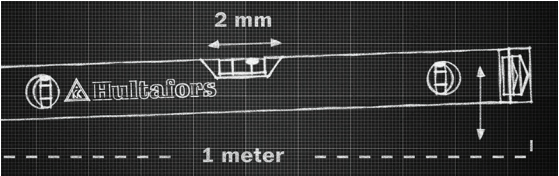

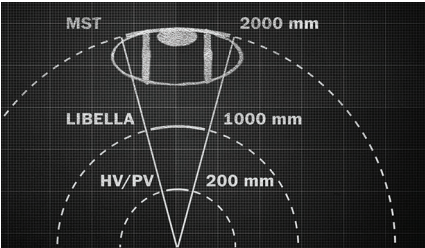

MST
Our strongest and most sensitive spirit level.
Made from strong aluminum.
Easy to clean.
70" length.

High sensitivity.

LEVELS FOR THE TASK.

Certain tasks require a higher sensitivity, which is why we produce spirit levels with varying degrees of vial sensitivity. We offer spirit levels with 5 to 10 times higher sensitivity than the standard for more precise measurements. The more sensitive the vial is, the more accurate your work will be. If the vial is too sensitive, the level may be difficult to work with. MST is our most sensitive spirit level.

Mini Pocket Level MPL Magnetic

Model #401313

Hultafors MPL Magnetic fits in any pocket, making it the perfect companion for everyday work. The strong magnet and V-groove edge facilitates measurement on flat or curved surfaces. It features a crush-proof focus vial with a +60% magnifying effect and a luminescent reflector for faster and better readability in dim light conditions.

- Compact size.
- Suitable for horizontal and vertical measuring.
- V-groove edge for measurement on flat or curved surfaces.
- Accuracy of 0.049° (±0.75 mm/m) in normal position.
- Crush-proof focus vial with magnifying effect.
- Magnetic edge.

Mini Pocket Level MPL

Model #401303

Hultafors MPL pocket level features a vial with magnifying effect for fast and reliable horizontal measuring. MPL fits in any pocket, making it the perfect companion for everyday work. It features a crush-proof, horizontal vial with a +60% magnifying effect and a luminescent reflector for better readability in dim light conditions.

- Compact size.
- Suitable for horizontal measuring.
- Accuracy of 0.058° (±1.00 mm/m) in normal position.
- Crush-proof block vial with magnifying effect.

Spirit Level Aluminum MST 180

Model #402901

The 70" MST level is our strongest and most sensitive spirit level. Three crush-proof block vials that are UV-resistant and withstand temperature changes with a +30% magnification lens and luminescent reflector for easier reading.

- The radius of the vial is 78" (2000 mm), giving a sensitivity of 0.001 in/in (±1 mm/m).
- Accuracy in normal position is 0.017° (±0.3 mm/m).
- The liquid in the vial is highly resistant to ultraviolet light and temperature fluctuations, giving the bubble optimal freedom of movement.
- Anti-static liquid protects bubble from static electricity.
- Holes in the aluminum frame for fastening the level against the wall for easier mounting of cabinets or cupboards.
- Easy to clean aluminum profile with ergonomic handles.

Spirit Level Aluminum PV

Model #414001

Extra strong aluminum profile with transparent, durable crush-proof block vials and temperature-proof vial mountings. Horizontal and vertical vials are highly resistant to ultraviolet light and temperature fluctuations.

- Highly transparent focus vials for easier reading.
- Horizontal vial with a +30% magnification lens and luminescent reflector for accurate readings.
- Accuracy of 0.029° (±0.5 mm/m) in normal and upside down positions.
- Low viscosity colored oil mixture in vial gives the bubble optimal freedom of movement.
- Anti-static liquid protects bubble from static electricity.
- Shock absorbing end protectors with anti-slip function.

Spirit Level Aluminum HV

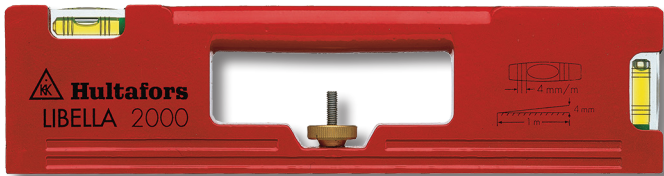

Model #411001

Strong, easy to hold aluminum profile. Crush-proof block vials that are highly transparent and durable. Horizontal vial with a +30% magnification lens and luminescent reflector.

- Accuracy of 0.029° (±0.5 mm/m) in normal position, 0.049° (±0.75 mm/m) upside down.
- Low viscosity colored oil mixture in vial gives the bubble optimal freedom of movement.
- High resistance to ultraviolet light and temperature fluctuations.
- Anti-static liquid protects bubble from static electricity.
- Crush-proof, highly transparent vials for horizontal and vertical leveling.
- Shock absorbing end protectors.

Spirit Level LIBELLA 2000

Model #407001

Libella 2000 has a smooth finished die-cast aluminum housing with milled measuring surface. Two crush-proof block vials with high transparency, durability, magnifying lens and luminescent reflector. May be supplemented with rails and extensions – Libella 2000 has a maximum length of 10 feet.

- The radius of the vial is 39" (1000 mm), giving a sensitivity of 0.002 in/in (±2 mm/m).
- Accuracy of 0.015° (±0.25 mm/m) in normal position, 0.049° (±0.75 mm/m) upside down.
- Low viscosity colored oil mixture in vial gives the bubble optimal freedom of movement.
- Two crush-proof vials for horizontal and vertical leveling.
- Vials are highly resistant to ultraviolet light and temperature fluctuations.
- Anti-static liquid protects bubble from static electricity.
- Quick and easy mounting on rails and extension bars.

Spirit Level Rail Libella

Model #407401

Model #407501

Model #407861

Aluminum spirit level rail with grooves for simple fitting on the Libella 2000. With rails and extensions, Libella 2000 becomes an extendable spirit level with a maximum length of 10 feet.

- Made from anodized aluminum to prevent your hands or the surrounding area from becoming dirty.
- Rail ends are equipped with protective fittings.
- For use with the Hultafors Libella 2000 Aluminum Spirit Level.

Libella 2000

MULTI-FUNCTION SPIRIT LEVEL.

Libella 2000 is a short spirit level cast in aluminum with a smooth-finished contact surface. It is equipped with crush-proof block vials that have magnifying lenses and a luminescent reflector, which facilitates reading in environments that are not optimal. The radius of the vial is 39" (1000 mm), giving a sensitivity of 0.002 in/in (2 mm/m). Accuracy in normal position is 0.015° (±0.25 mm/m), upside down is 0.049° (±0.75 mm/m). Adding spirit level rails and gradient wedges will increase the number of applications your Libella 2000 can be used for.

1. When fitting door/window frames, Libella 2000 can be used with a spirit level rail.
2. Using a spirit level rail and extensions, the maximum length is increased to 10 feet.
3. In narrow spaces, use Libella 2000 only.
4. You can check inclines using a gradient wedge.

Striking.

Developed with pros.

THE NEXT GENERATION OF HAMMERS.

Our hammers are developed together with professional users, enabling us to deliver tools that can be relied on. We offer an assortment of hammers including claw hammers, dead blow hammers and bricklayer's hammers. They have all been developed to fill one purpose – to streamline the work day without compromising the ergonomics.

CLAW HAMMER TC

Forged in one piece.

reddot design award
winner 2008

Ergonomic design.

DEVELOPED WITH YOUR BODY IN MIND.

Our hammers are developed with your body in mind. For us it's as important that the hammer head is causing as little vibration as possible, as it is to design an ergonomic shaft in a variety of sizes. This enables you to choose a hammer that gives you a relaxed grip and causes less strain on the body. The difference is also noticeable in the long term, as the technology reduces the risk of stress-related injuries.

A really good hammer just feels right.

STATEMENT BY THE JURY.

Hultafors products are developed with one purpose – to streamline the tradesman's workday with long-lasting products in durable materials without compromising on ergonomics. Our series of award-winning hammers focus on functionality, flexibility and ergonomics. The seamless transition between the handle and the head underlines the solid and compact design of the hammer.

Straight Claw Hammer TR

Model #820220U

An ergonomically designed straight claw hammer forged in one piece for increased durability with a vibration damping urethane plug. The claw opening and angle give the best possible grip on the nail.

- Straight claw for better access and a longer shaft for more power for more demanding applications.
- Thin, strong claw for easy access without leaving marks.
- Vibration damping urethane plug.
- Right angle and shape of striking face.
- Steel shaft with I-profile for increased durability.
- Rounded claw to prevent tearing your pants.

Dead Blow Hammer DB

Model #823411U

Hammer head covered with urethane and a dead blow function using steel balls to cushion the shock and reduce recoil.

- Soft face protects job surfaces and equipment.
- Dead blow function uses steel balls to cushion the shock and reduce recoil.
- Ergonomic handle with rubber grip.
- Flat area on head allows upright storage.

Bricklayer’s Hammer M

Model #822251U

Blasted and clear-lacquered ironwork, with tempered square striking face and wide, ground chisel.

- The hammer head is hand-forged with a tempered chisel and striking face.
- Notch for nail pulling.
- Remove plaster with ease.
- Hickory shaft.
- Steel head.

Weight	Description	Model #
1.8lb / 820g	Bricklayer’s Hammer M 600	822251U

Bricklayer’s Hammer TB

Model #822281U

An ergonomically designed hammer forged as one piece for increased durability with a vibration damping urethane plug. Tempered square striking face and a strong ground chisel with a notch for pulling out nails.

- Right angle and shape of chisel for safe splitting of bricks.
- Steel shaft with I-beam for increased durability.
- Vibration damping urethane plug.
- Handle with a distinct end stop to ensure a secure grip.
- Tempered square striking face.
- Notch for nail pulling.

Weight	Description	Model #
2.0lb / 900g	Bricklayer’s Hammer TB 600	822281U

Nail pullers.

Nail Puller Atle

A versatile and easy-to-use nail puller. Despite its small size, the Atle can easily pull out a 5-inch nail, even when the head is off or buried deep in the wood.

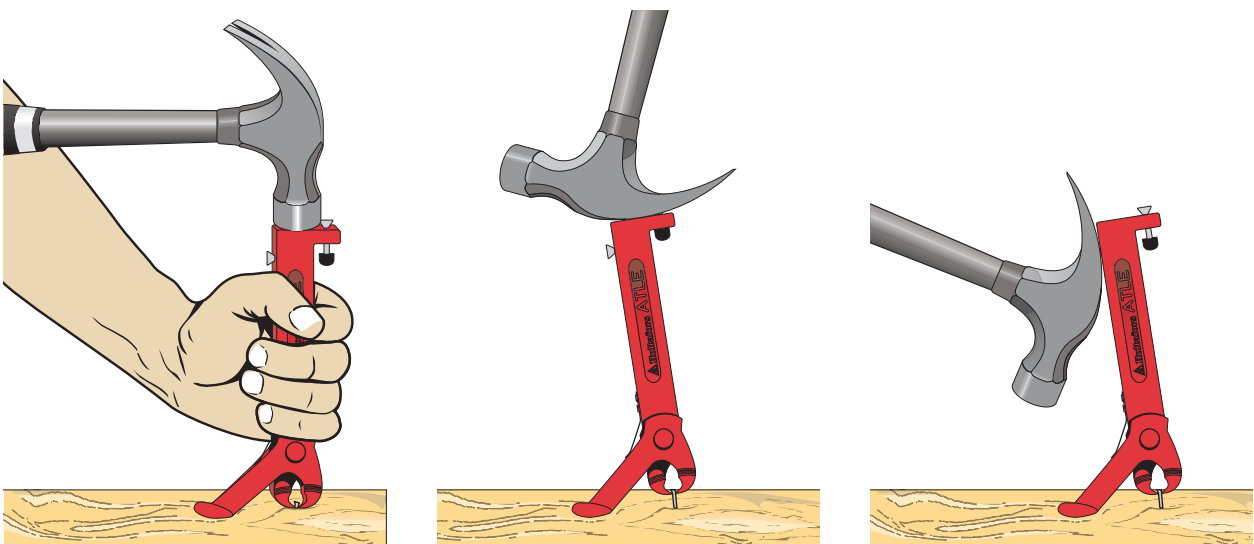

Model #820030U

- Use with your carpenter's hammer and pull using the claw.
- Made from steel.
- Easily pull out a 5-inch nail.
- Great for pulling nails even when head is off or buried deep in the wood.
- Compact size.

Weight	Length	Description	Model #
1.3lb / 580g	8"	Nail Puller Atle	820030U

Nail Puller Atle

VERSATILE AND EASY-TO-USE.

Atle is a versatile and easy-to-use nail puller that helps you pull out nails, even when the head is off or the nail is buried deep in the wood.

Atle is used together with your carpenter's hammer to pull out the nail. You just use the claw of your hammer.

Snap-off knives.

The sharpest choice.

SHARP KNIVES FOR VARIED TASKS.

The most important feature of a knife is a sharp edge. With our complete range of snap-off knives you will always have excellent sharpness and precision close to hand, over and over again, without interruption. This means a more efficient workflow with fewer distractions for the professional tradesman. The snap-off knife is the perfect choice for jobs demanding extra sharpness, such as cutting cardboard, drywall or carpets.

SNAP-OFF KNIFE SFRP 18A/W

The SFRP 18A/W is an ergonomic snap-off knife with tail fin.

Used for cutting drywall, insulation, cement board and wood.

Available with auto lock or wheel lock function.

Symmetric design for right- and left-handed usage.

Use as a guide for measuring 45° and 90°.

0.039" (1 mm) thick metal blade rail for additional stability.

SFRP 18A

Tucks carpets or opens cans.

The knife can hold a dispenser with 3 spare blades.

SFRP 18W

Steel core for added stability.

Rubberized grip makes it suitable for materials demanding more power.

Made in durable and sustainable PC-plastic (polycarbonate).

Tapered for better visibility, access and control.

Perfection in every cut.

PRECISION OR FLEXIBILITY.

Professional tradesmen demand professional knives with a sharp edge. With our snap-off knives you will have excellent sharpness and precision, over and over again, without interruption. We know that different tasks require different types of blades, so we offer an assortment of ergonomic snap-off knives and spare blades with different strengths to fit the task at hand. This means more efficient work with fewer distractions for the professional tradesman.

Slim or rubberized grip?

DEPENDING ON THE JOB.

Our range of snap-off knives includes knives in slim version and versions with rubberized grip. The slimmer version offers you a sharp and precise knife in a compact format, taking up less space in the pocket. Knives with the rubberized grip are a better choice for materials demanding more power, like cutting in carpets, drywall or wood. The surface offers a better grip, especially if your hands are a bit wet. Also, the knives with rubberized grip can hold a dispenser with three spare blades.

Snap-off Knife SPP

The SPP is a robust snap-off knife for a wide range of jobs. Slim design is tapered for better visibility, access and control. The knife features 0.039" (1 mm) thick metal blade rail with durable plastic housing and steel core for added stability.

- SPP 9A for cutting paper or opening boxes.
- SPP 18A/W for cutting plastic, drywall, stripping cables and removing silicone residue.
- SPP 25A/W for cutting thick carpets or insulation.
- Angled tip for estimating 45° & 90°.
- Symmetric design for right- and left-handed use.
- Slim design can be stored in pocket.

Snap-off Knife SRP

The SRP is an ergonomic snap-off knife for anything from all-round use such as cutting drywall, insulation and wood to cutting thick carpets or insulation. The design with rubberized grip makes it suitable for materials demanding more power. Tapered for better visibility, access and control. The knife features 0.039" (1 mm) thick metal blade rail with durable plastic housing and steel core for added stability.

- SRP 18A/W for cutting drywall, insulation and wood.
- SRP 25A/W for cutting thick carpets or insulation.
- Angled tip for estimating 45° & 90°.
- 0.039" (1 mm) thick metal blade rail for additional stability.
- Symmetric design for right- and left-handed use.
- Includes dispenser inside with 3 spare blades.

Snap-off Blade Allround

Model #389630U

A reliable blade for everyday cutting with excellent sharpness and long life. The box can be used for snapping blades and safely storing worn-out blades. Recycle worn-out blades as metal scrap.

- Used for cutting plastic, drywall, stripping cables and opening boxes.
- Graded to show how many fresh edges there are left.
- 8-12 sections per blade; the last blade can be used.
- 0.4" (9 mm) blade comes in a pack of 10.
- 0.7" and 1" (18/25 mm) blades come in storage box with four dispensers holding three spare blades each.
- The box can be used for snapping blades and safely storing worn-out blades.

Snap-off Blade Performance

Model #389920U

A blade with sharp long-life performance for tougher cuts. The box can be used for snapping blades and safely storing worn-out blades.

- Developed for cutting insulation, drywall and carpets.
- Comes in a practical storage box with 4 dispensers holding 3 spare blades each.
- 8 sections per blade, the last blade can also be used.
- The box can be used for snapping blades and safely storing worn-out blades.

Advanced knives.

PLAIN AND SIMPLE.

A really good knife should fit perfectly in your hand and be easy to use. At the same time, it should be safe, reliable and have all the important functions. To make our utility knives as user-friendly as possible, we have eliminated all unnecessary components and minimized the number of moving parts. This not only extends the service life of the knife, as there are fewer parts that can break, it also makes it easier to keep the knives clean.

URA

Specialized blades.

BLADES WITH A PURPOSE.

At Hultafors, we know that one blade does not suit all needs. That's why we offer a range of blades engineered for specific purposes. The sharp Allround blade is a reliable choice for everyday cutting. The Performance blade is a great choice for big drywall jobs and offers extraordinary long-life performance. And finally, the Edge, a blade that brings extra sharpness for when the job demands higher than usual precision.

Changing the blade.

STORING BOTH NEW AND WORN OUT BLADES.

On the inside of our utility knives we have placed a practical spring-loaded dispenser that holds five to ten spare blades. The dispenser can also store worn-out blades so that you never have to think about where to place them. The blades can be changed quickly and easily with no extra tools required.

Utility Knife URA

Model #388020U

Light and efficient 6” utility knife with a great grip, ergonomically designed for best possible safety, comfort and control. Comes with 11 Allround blades; 10 blades in the dispenser stored inside the knife.

- Ergonomic, angled design with a natural finger grip and a tapered point for an excellent grip.
- Screw wheel for opening the knife with no tool needed.
- Practical spring-loaded dispenser holds 10 spare blades inside the handle.
- Few moving parts facilitates cleaning and change of blades.
- Dispenser can be used for safely storing used blades.

Utility Knife URZ

Model #388050U

Sturdy and well-balanced 6” utility knife with ergonomic design for best possible safety, comfort and control. Comes with 11 spare Allround blades; 10 in dispenser stored inside the knife.

- Ergonomic, angled design with a natural finger grip and a tapered point for an excellent grip.
- Robust cover in zinc with screw wheel for opening the knife with no tool needed.
- Practical spring-loaded dispenser holds 10 spare blades inside handle.
- Few moving parts facilitates cleaning.
- Change blades simply and easily.
- Dispenser can be used for safely storing used blades.

Insulation Knife FGK

18” (465 mm) blade

Model #389010U

An Insulation knife with a 2” (50 mm) wide, flexible blade and scale. Serrated blade and grip-friendly handle made from impact-resistant plastic for easy cutting.

- Blade is made with 2” (50 mm) wide carbon steel.
- Serrated edge makes it easy to cut through all types of insulation.
- Handle and holster are made from durable PP plastic.
- Centimeter (cm) scale on the blade makes for quick measurements.
- Holster included.

Utility Blade Allround

Model #388550U

A great blade with excellent sharpness and long life. Developed for all-round use wherever there is a need for cutting with precision and control. Used blades can be stored on the back of the dispenser to keep the workplace safe.

- Optimized for universal use to match the needs of professional tradesmen.
- Made from SK5 carbon steel hardened to 58-60 HRC.
- 10-blade or 100-blade options available.
- Stores used blades improving safety at the workplace.
- Spring-loaded dispenser. Push to dispense a new blade.
- 10-blade dispensers fit inside the handle of utility knives.

Utility Blade Edge UBE-10

Model #388720U

A blade with extraordinary sharpness developed for tasks where the demand for precision is higher than usual. Sharper than our Allround blade though not as robust. Used blades can be stored on the back of the dispenser to keep the workplace safe.

- Extraordinary sharpness when regular sharpness is not enough.
- Made from SK2 carbon steel hardened to 58-60 HRC.
- 10 blades in pack.
- Spring-loaded dispenser. Push to dispense a new blade.
- Stores used blades improving safety at the workplace.
- Dispenser fits inside the handle of utility knives.

Utility Blade Performance UBP-10

Model #388920U

A blade with extraordinary long-life performance. Made from hardened carbon steel for a greater sharpness and extended lifetime compared to the competition. A great choice for when big drywall jobs await.

- A hard and sharp blade with extra-long life.
- Made from German L22 carbon steel hardened to 61 HRC.
- 10 blades in pack.
- Spring-loaded dispenser. Push to dispense a new blade.
- Stores used blades improving safety at the workplace.
- Dispenser fits inside the handle of utility knives.

Award-winning chisels.

SHARP, RELIABLE AND ALWAYS ON HAND.

Chisels have always had a prominent place in the tool kits of professionals. It has often been regarded as an all-round tool used for everything from cutting and prying to scraping. When we developed our range of chisels, we looked at what professional tradesmen need in their daily work. The result was a series of high-quality chisels for tradesmen who want something extra in terms of strength, function and precision. The robust design offers outstanding strength and impact resistance to ensure a sharp, reliable tool that is always on hand.

CHISEL HDC

Durable nylon striking face.

Forged in one piece for extremely high breaking capacity and impact resistance and for better transfer of power.

Santoprene handle for perfect grip and precision.

Can be placed flat against the work surface, enabling material to be removed without damaging the underlying surface.

Smart holster for easy access at all times.

Made from double-tempered high-quality steel.

Sharpened into a 25° angle for optimum balance between sharpness and durability.

reddot award 2015 winner

HDC CHISELS

When we observed tradesmen at work, it quickly became apparent that they needed a chisel that is easy to carry and can be used for various types of work. These tradesmen called for extremely high quality chisels, which were previously absent from the market. With their needs in mind, we developed the Hultafor HDC Chisel - a unique chisel with a uniform steel construction, forged in a single piece. A highly robust, sharp and durable chisel for tradesmen who want something extra in terms of strength, function and precision.

Chisel HDC

Model #390273U

Blade Width	Description	Model #
0.75" / 20 mm	Chisel HDC 20	390263U
1" / 25 mm	Chisel HDC 25	390273U
1.25" / 32 mm	Chisel HDC 32	390283U
1.5" / 40 mm	Chisel HDC 40	390293U

The HDC 10" Chisel is a heavy-duty, sharp tool that is ready for tasks requiring extreme strength and precision. A perfect ground blade beveled at 25° for the best ratio possible between sharpness and durability. The entire chisel, including the handle, can be positioned flat against the surface for expanded uses. Smart holster made from durable plastic can be attached to a belt or on a button for easy accessibility.

- Continuous I-beam for extreme durability and to maximize the force transmission to the work piece.
- Blade made from high-quality steel, perfectly sharpened into a 25° angle.
- Flat contact surface for a number of applications.
- Ergonomic plastic handle optimized for both power and precision.
- Holster made from durable plastic with holes for better ventilation.

Chisel Knife STK

Model #380070U

Robust 8" knife with V-ground chisel function offers two tools in one. STK features a unique function for attaching the holster around a button on your work clothes so that it does not come loose while still being easy to remove.

- Sharpened cutting edge.
- Blade made of Japanese 3 mm carbon steel hardened to 58-60 HRC.
- Continuous I-beam for extreme durability.
- Handle and holster are made from durable PP plastic.
- Holster can be attached to both a belt and a button on your work clothes.

Double Holster JS & URA

Model #381060U

Double holster JS & URA includes the Jab Saw JS and Utility Knife URA – the perfect combination for those working with drywall. A double holster allows you to have access to the two knives you use the most, so your job gets done efficiently.

- 5-inch Jab Saw with graded scale for drywall cutting.
- JS features 3-phase grinding for high efficiency cuts without damage to surrounding materials.
- 6-inch URA Utility Knife for all-around use.
- URA's practical spring-loaded dispenser holds 10 spare blades inside the handle.
- Double holsters for different combinations of knives.
- Once the knives are worn out, keep the holster and re-use it with new knives.

Double Holster STK & URA

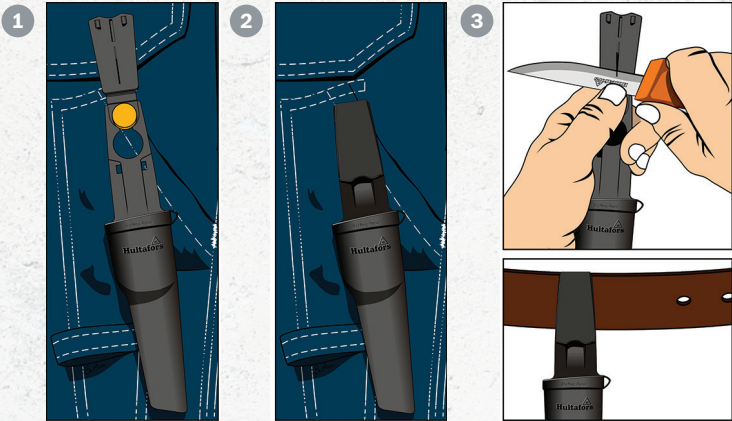

Model #381070U

Double holster STK & URA allows you to have access to the two knives you use the most, so your jobs get done efficiently. The STK chisel knife is two tools in one offering a robust knife with a V-shaped ground chisel function. The ergonomically designed URA utility knife offers great grip when cutting drywall, carpets and wallpaper.

- Chisel Knife STK is a robust knife for simpler woodwork.
- 8-inch STK features a sharpened V-ground cutting edge.
- 6-inch URA Utility Knife is for all-around use.
- URA's practical spring-loaded dispenser holds 10 spare blades inside the handle.
- Double holsters for different combinations of knives.
- Once the knives are worn out, keep the holster and re-use it with new knives.

Holsters

SAFE ATTACHMENT TO BOTH BELT AND BUTTON.

1. You simply attach the holster to a button on your pants using a unique function that ensures the holster doesn't come loose while still making it easy to remove.
2. Insert the button into the hole, pull the holster down and snap the cover firmly in position. To remove the holster, just undo the cover.
3. The holster can also be worn on a belt. If you have a thick belt, you may need to cut off the pin on the cover.

Precision in every cut.

A GOOD SAW IS ALL ABOUT EFFICIENCY.

Hultafors offers a complete range of handsaws for any type of challenge and all types of jobs. Our saws come in different designs; handsaws, hack saws and various special saws for cutting most materials, including wood, metal, concrete and drywall. The common denominator for all our saws is precision and control. As we know, professional tradesmen expect a great deal from their saws.

HBX

Environmentally friendly wax-coating for low friction and vibration.

Protected against rust.

Made from recycled steel.

Covered with rubber for a perfect grip.

3-phase profile for efficient cutting without chipping.

Quick-release blade guard for effective protection.

Simple system for changing blade thanks to two screws.

Ergonomic design in high impact ABS plastic.

reddot award 2015 winner

Choose the right saw.

WHAT IS YOUR CHALLENGE?

HANDSAW

Our handsaws ensure you will get the job done and are a reliable choice for all-round cutting as well as precision work. Our different models are customized depending on how frequently they are used and for what tasks. All our handsaws are made in durable material and with the professional user's efficiency in mind.

HACK SAW

Our hack saws are the perfect choice when you need to do precision work. All our hack saws come in handy sizes, from pocket size up to 12 inch. Thanks to high blade tension, they all deliver precision cuts without compromising on efficiency.

Handsaw HBX-22-9

Model #590903U

22-inch HBX Handsaw features unique teeth with 3-phase grinding that combines efficiency and a good bite with nice, straight cuts without chipping. Quick-release blade protection, ergonomic handle and exchangeable blades. The 0.039" (1 mm) thick steel blade with an eco-friendly coating gives less friction and power-consuming side vibrations. Durable three-component handle has a comfortable ergonomic grip.

- Unique teeth (9 TPI) with 3-phase grinding combines efficiency and a good bite without chipping.
- Environmentally friendly wax coating reduces friction and minimizes the risk of pinching.
- Reliable and secure system for changing the blade.
- Ergonomic handle with rubber grip and 45° and 90° angle guide.
- Robust blade protection with quick release function.

Toolbox Saw HBX-14-11-S

Model #590750U

Professional 14-inch short saw for increased mobility and flexibility. The blade features eco-friendly wax-based coating that provides low-friction and good rust protection. The teeth of the saw blade are hardened to give a long life and fine cuts, making this product ideal for precision work.

- Unique teeth (11 TPI) with 3-phase grinding combines efficiency and a good bite without chipping.
- 0.039" (1 mm) thick steel blade.
- Ergonomic handle with rubber grip and 45° and 90° angle guide.
- Robust blade protection with quick release function.
- Reliable and secure system for changing the blade.
- Environmentally friendly wax-based powder coating.

Jab Saw JS

Model #591260U

A 5" jab saw designed for cutting drywall. The blade is made in 0.062" (1.6 mm) high-quality steel for increased stability and precision. The blade is 3-phase ground to secure high-efficiency without damaging surrounding materials. The blade is anti-rust treated, so do not forget to clean the blade and protect it with oil to maintain the protection over time.

- 5-inch jab saw for drywall cutting.
- 3-phase grinding for high-efficiency cuts without damage to surrounding materials.
- Anti-rust treated 1.6 mm thick steel blade.
- Graded scale on the blade.
- Ergonomic handle with hole to attach a securing device.
- Robust holster included for safe usage.

Hacksaw HMS-12

Model #591310U

A 12" steel frame hacksaw for precision, performance and high blade tension. The ergonomically shaped handle is made from cast aluminum and complemented with a grip friendly plastic support at the front of the frame. The blade can be tilted for cutting close to a flat surface without loss of performance and precision.

- Steel frame.
- Very high blade tension.
- Ergonomic handle with aluminum grip.
- Spring-loaded blade tensioner.
- Blade can be tilted for cutting close to a flat surface.
- Hultafors 12-inch BI-metal blade (24 TPI) included.

Hacksaw HMX-12

Model #591300U

A professional 12" hack saw with a stiff and compact cast aluminum frame for low weight, maximum performance and very high blade tension. The handle is ergonomically shaped with a rubber grip to maximize user friendliness. The blade can be tilted for cutting close to a flat surface without loss of performance and precision.

- Compact cast aluminum lightweight frame.
- Very high blade tension.
- Ergonomic handle with rubber grip.
- Spring-loaded blade tensioner.
- Blade can be tilted for cutting close to a flat surface.
- Hultafors 12-inch BI-metal blade (24 TPI) included.

Hacksaw Spare Blade

Model #591340U

12" Spare Blade for Hacksaw with 18 TPI (rough/medium) or 24 TPI (medium) for cutting metal bars, profile and tubes. High performance and durable bi-metal blade.

- Options of 18 or 24 teeth per inch.
- 12" blade.
- 2 blades in pack.

Pry bars & wrecking bars.

Demolish with quality.

WIDE RANGE OF WRECKING BARS.

When completing demolition work, it's important to choose a tool with adequate leverage and good ergonomics. Hultafors wrecking bars rise to the challenge. We produce a wide range of different bars, including pry bars, wrecking bars and bending bars, in several different designs, sizes and materials so that you can always find the perfect tool for your job.

WRECKING BAR STEEL ADJUSTABLE 209 SB

Adjustable claw in nine steps for best working position.

Thanks to its gear ring, it can handle the same stresses as a standard wrecking bar.

Made of high-quality steel.

Optimized for pulling out nails.

The curved section at the handle makes space for the hand and minimizes the risk of crushing damage.

Secure strap function.

Ergonomic rubber-clad handle.

Wide, ground contact surfaces and thin ends make it easy to use and reduce the risk of leaving marks.

reddot design award
best of the best 2012

Steel or aluminum.

WILL OF STEEL OR FLEXIBLE AS ALUMINUM

Steel is almost three times as heavy as aluminum, but it is also three times as strong. When doing work where weight and power is critical to achieving a good result, steel is the obvious choice. Aluminum is easier to work with and gentler on the materials. It doesn't rust, is more resistant to cold and is much more flexible. An aluminum tool can be "bent" about three times as much as a steel tool without becoming deformed, making it ideal for fitting and adjusting construction materials.

Ergonomical tips.

BE KIND TO YOUR BODY.

To help you steer clear of any injuries, we've come up with a few tips. Always work with a straight back but try to avoid working with straight arms. You should also avoid working with bent wrists. The best thing to do is to try and change your work posture as often as you can. Also try to avoid getting into too many situations that involve jerking and wrenching. It's also good to know that aluminum is considerably gentler on your body, particularly when working at shoulder height or above.

Wrecking Bar Steel 109

Model #824010U

Wrecking bar made from hardened, high-alloy boron steel that will bend but will not break. Wide, ground contact surfaces and thin ends make it easy to use in narrow spaces and reduce the risk of leaving marks.

- Made from hardened, high-alloy boron steel.
- Wide, ground contact surfaces and thin ends allow easy access in narrow spaces.
- Unpainted ends reduce leaving marks.
- The claw is optimized for pulling out nails.
- High-visibility powder coated finish.
- No sharp edges on bar.

Length	Weight	Description	Model #

36"	6.3lb / 2850g	Wrecking Bar Steel 109/36"	824013U

Wrecking Bar Steel 108

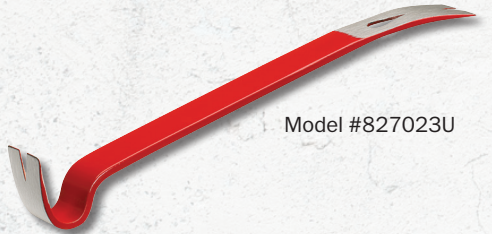

Model #827013U

A small, versatile steel wrecking bar that can be used for pulling out nails and for breaking, scraping and lifting.

- Thin contact ends allow easy access in narrow spaces.
- Unpainted ends reduce leaving marks.
- Attractive, highly visible red finish.
- Has three functions for pulling out nails.
- Can be used for breaking, scraping and lifting.

Length	Weight	Description	Model #

7.5"	0.2lb / 77g	Wrecking Bar Steel 108 MINI	827023U

Wrecking Bar Steel Adjustable
209 SB/25"

Model #824115U

Wrecking bar manufactured in high-quality steel with ergonomic rubber-clad handle. Articulated claw adjustable to nine different positions features notched end ideal for pulling out nails. The curved section at the chisel makes space for the hand and minimizes the risk of crushing damage.

- Adjustable claw in nine steps for best working position.
- Wide, ground contact surfaces and thin ends allow access in narrow spaces and reduce the risk of leaving marks.
- Adjustable to ensure optimum working position.
- Forged I-beam profile and hardened the entire length.
- Secure strap function for working at heights.
- Easily break up wooden floors, lift doors or adjust construction framework.
- Ergonomic rubber-clad handle ensures firm and comfortable grip.

Pry Bar Aluminum, with Pinch Point

Lightweight pry bar able to withstand high-breaking loads. The bent point prevents trapping your fingers close to the floor.

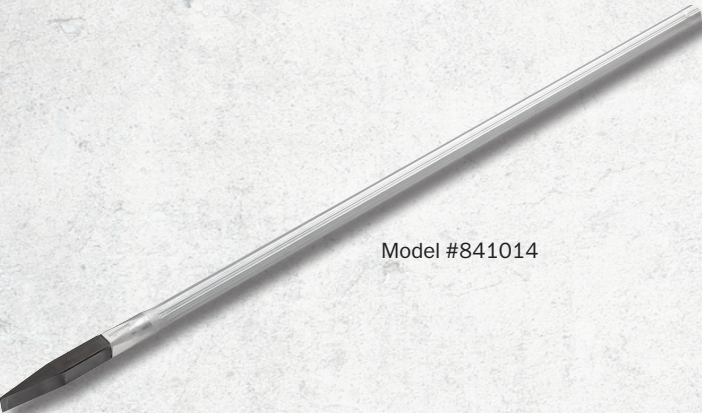

Model #841024

- Manufactured in aerospace aluminum for high strength and less flexing.
- Lighter and easier to work with, especially when working at shoulder height.
- An aluminum tool that does not rust and has a better resistance to cold.
- It can be bent about three times as much as a steel tool without being deformed.
- Long lasting hardened steel SB-27 tip.

Length	Weight	Description	Model #
59"	7lb / 3200g	Pry Bar Steel Adjustable, with Pinch Point A 1500 SB	841024

Pry Bar Aluminum, with Steel Point

An aluminum pry bar that also can endure breaking work. Long lasting SB-27 hardened steel tip used to cut and strike. Lightweight aluminum body for less user fatigue. This tool combines strength and flexibility; can flex under loads or spring back from shock of impact.

Model #841014

- Manufactured in aerospace aluminum for high strength and less flexing.
- Lighter and easier to work with, especially when working at shoulder height.
- Non-corrosive aluminum does not rust and is well suited for cold temperatures.
- Can be bent about three times as much as a steel tool without being deformed.
- Long lasting SB-27 hardened steel tip used to cut and strike.
- Lightweight aluminum body for less user fatigue. Tool that combines strength and flexibility, can flex under loads or spring back from shock of impact.

Length	Weight	Description	Model #
59"	8lb / 3600g	Pry Bar Steel Adjustable, with Pinch Point A 1500 SR	841014

Bending Bar Aluminum F 430 & F 820

Aluminum bending bar with cone shaped tip. Used to fit flanges together with bolt holes and to gently bend copper pipes.

Model #841010

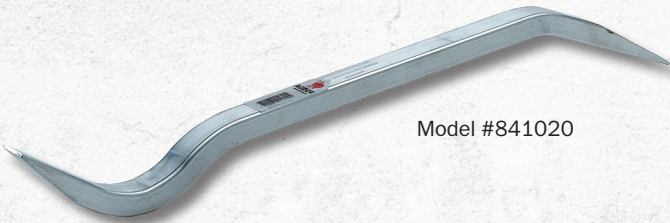

Model #841011

- Light aluminum bending bar that is easy to work with. Gentler to the material you work with.
- An aluminum tool that does not rust and can better withstand cold conditions.
- Cone shaped tip.
- Used to fit flanges together with bolt holes and to gently bend copper pipes.

Length	Weight	Description	Model #
17"	1lb / 400g	Bending Bar Aluminum F 430	841010
32"	3.75lb / 1700g	Bending Bar Aluminum F 820	841011

Bending Bar Aluminum H 480 B

Aluminum bending bar with bent tip. This is a shorter version of the H 700 pry bar, designed to fit in a toolbox. Usually used in car workshops to adjust wheel alignment.

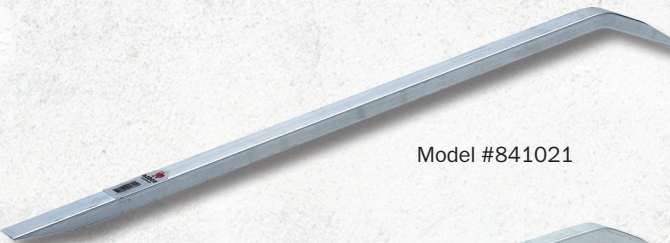

Model #841020

- Light aluminum bending bar that is easy to work with.
- Gentler to the material you work with.
- An aluminum tool that does not rust and can better withstand cold conditions.
- Compact size can fit in toolbox.

Length	Weight	Description	Model #
19"	1lb / 500g	Bending Bar Aluminum H 480 B	841020

Bending Bar Aluminum H 700 & H 700 B

Aluminum bending bar used as a practical tool within construction industries. The H 700 for removing ice from wheels and testing the brakes on train carriages. The H 700 B produced to test wheel bearings on cars, but also used by locksmiths to adjust door fittings.

Model #841021

Model #841022

- Light aluminum bending bar that is easy to work with.
- Gentler to the material you work with.
- An aluminum tool that does not rust and can better withstand cold conditions.

Length	Weight	Description	Model #
27"	1.5lb / 700g	Bending Bar Aluminum H 700	841021
27"	1.5lb / 700g	Bending Bar Aluminum H 700 B	841022

Adjustable wrecking bar.

The adjustable wrecking bar in aluminum can be set in nine different positions. This gives you an optimal tool for demolishing, bending and adjusting. The wide, ground contact surfaces and thin ends make it easy to use and reduce the risk of leaving marks.

The adjustable wrecking bar is safe to work with and is considerably gentler on your body, particularly when working at shoulder height or above.

Products for the Pros from Head to Toe

HULTAFORS **GROUP** offers everything the professional needs to get the job done through a full line of premium brands.

Every one of our brands is united with a common passion: to offer best-in-class products and services that improve functionality, productivity and safety in all aspects of professional user's workday.

We promise to meet, and even anticipate the ever-changing demands of the worksite by designing and precision-engineering the tools, work gear, apparel, footwear, safety gear and more that makes the job safer, easier and more productive.

If your product comes from a Hultafors Group brand, you can rely on it. Period.
