

## Power Grip - Circuit Analyzer - 30Amp Plug-Type 125V

The Camco PowerGrip RV 30-Amp Circuit Analyzer Adapter with Integrated Surge Protection and Fault Indication helps protect your RV from power surges. Diagnostic LEDs indicate wiring faults when you connect your electrical cord to the power pedestal. The circuit analyzer indicates faults for reverse polarity, open neutral and other wiring issues. Includes integrated surge protection of up to 1,050 Joules. 30-Amp male (NEMA TT-30P)/30-Amp female (NEMA TT-30R). Does not protect against sustained high or low voltages. Patented.

RV Electrical Protection: Protects your electrical equipment from power surges

Diagnostic LEDs: Provide indication of faults when you connect your electrical cord to the power pedestal

Indicates Wiring Issues: Indicates faults for reverse polarity, open neutral and other wiring issues

Integrated Surge Protection: Up to 1,050 Joules

30-Amp: 30-Amp male (NEMA TT-30P)/30-Amp female (NEMA TT-30R)

Patented: Product is patented
