

# LITE BLOX™

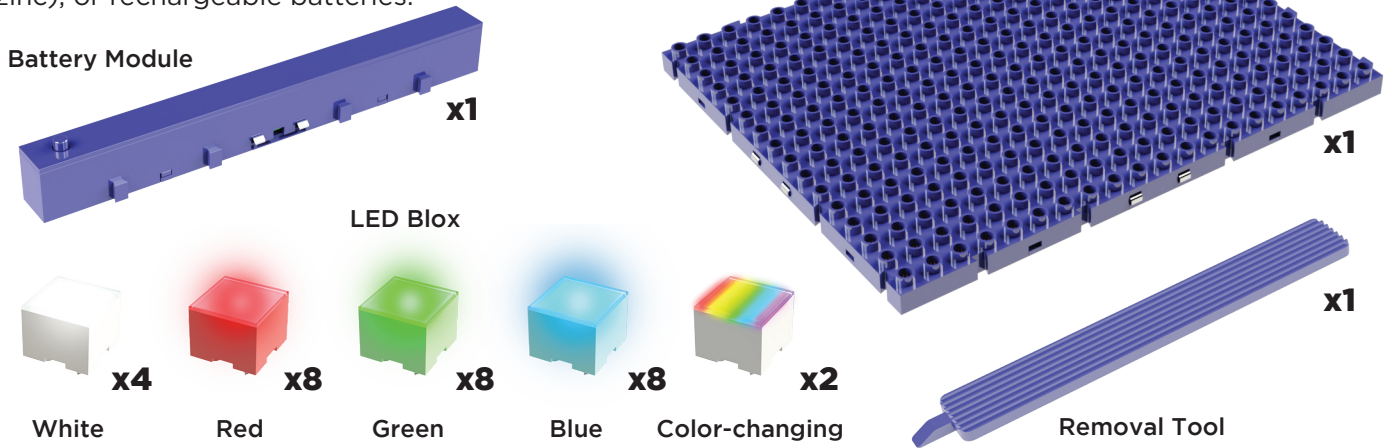

## INTRODUCTION

E-Blox® Lite Blox™ is specially designed to make it fun and easy to build cool light pictures and patterns. Just follow these step-by-step instructions to insert the batteries and setup the power board and then plug the LED Blox into the power board to build pictures and patterns that illuminate. Some of the LED Blox even flash and change colors to make your pictures and patterns look really cool!

## COMPONENT LIST

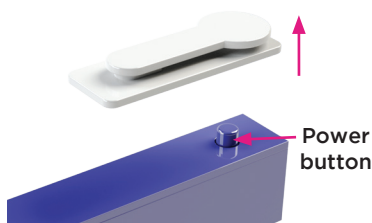

### Note:

Do not mix old and new batteries.  
Do not mix alkaline, standard (carbon-zinc), or rechargeable batteries.

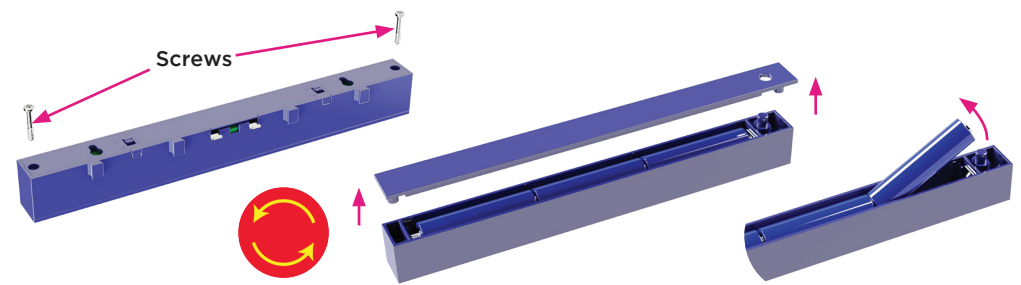

## POWER BOARD SETUP

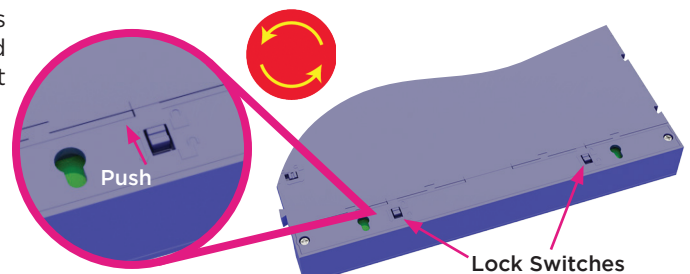

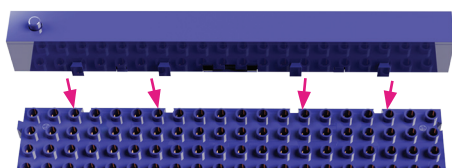

**STEP 1** - Remove the Try Me packaging plastic piece from the battery module. In order to turn on the Power Board properly, it is important to remove the plastic piece near the power button as shown below.

**STEP 2** - To replace the 3 “AAA” batteries that come with your product with 3 fresh “AAA” batteries, remove the screws from the bottom of the battery module as shown below. Flip the module over and take off the top cover. New alkaline batteries are recommended for best results. Never mix different types of batteries together in the battery module! Secure the top of the battery module by putting back in the screws.

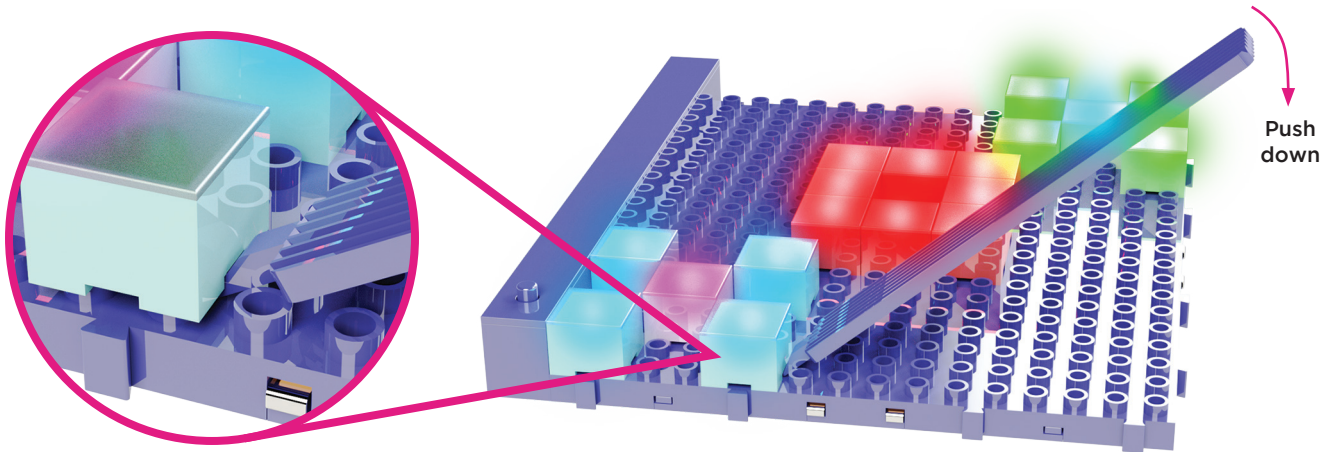

**STEP 3** - Attach the battery module to the Power Board as shown below. Once in place, flip the Power Board over and push the battery module lock switches as shown on the right to firmly hold the battery module to the Power Board.

## BUILDING WITH LITE BLOX™

Make sure the power button is pushed DOWN, and then start plugging the LED Blox into the Power Board. When the pins on the bottom of the LED Blox are plugged into the holes of the Power Board, the LED Blox will light. Use the removal tool as shown below to take out the LED Blox if you cannot remove them with your fingers. Now have fun building whatever light pictures and patterns come to your imagination!
