

#### CAMCO Curved Leveler Instructions:

- Choose a flat, even area for parking
- Clear ground of rocks and other debris
- Push Curved Leveler against tire to be leveled, placing lowest end toward tire
  - **Note: Use one Curved Leveler kit per axle**

Drive tire onto appropriate height and apply parking brake

- Firmly push supplied wheel chock against leveler to stabilize
- Carefully drive forward over leveler to remove

Curved Leveler and Chock are not for use as a standalone wheel chock. Never place yourself under or behind unstable vehicles. Prolonged exposure to sunlight can cause Curved Leveler to weaken. Store out of sunlight in a dry dark place. Works with tires up to 32" (81,3cm) in diameter.
