DeepBlue Dye is formulated to provide ponds with a dark blue color. One single gallon of DeepBlue Dye will treat up to one surface acre 4' – 6' deep, for several months, depending on amount of rainfall and/or severity of sunlight. DeepBlue Dye should be used all year long.

Application Rates

Use 1–2 gallons per surface acre, 4–6 ft. deep, every 4–8 weeks or as needed.

SHAKE WELL BEFORE USE

How To Apply: Shake well before use. Simply pour DeepBlue Dye in several spots along the pond's edge – no mixing required.

When to Apply: For year-long beauty, apply in early spring. Water temperature has no effect on DeepBlue Dye and should be applied monthly or as needed to maintain a deep blue color all season long. Heavy rain and/or intense sunlight may require additional treatments of pond dye.

Water Use Restrictions: DeepBlue Dye may be applied to lakes and ponds used for irrigation and aquaculture. Water treated with DeepBlue Dye may be used for recreation, fishing and other activities immediately after treatment. Safe for recreational

ponds, horses, livestock, birds, pets, fish, wildlife and the environment. Do not apply to water that will be used for human consumption.

Storage And Handling: Keep product in original container and closed when not in use. Store in a cool, dry place. Do not allow to freeze. Wear rubber gloves when handling. Avoid contact with skin, eyes and clothing. Wash with soap and water after use. If ingested in large amounts, induce vomiting. For small cleanups and surface stains, use a diluted bleach solution.

Attention: Failure to use as directed, or sudden changes in water conditions not consistent with label, may result in the loss or injury of aquatic life. Airmax Inc. is not responsible for any loss of aquatic life.
