

Van Zyverden's
BLEEDING HEART FIRE ISLAND PP

Flowers in the genus of *Dicentra* are often commonly referred to as bleeding hearts due to their shape that seems to be more obvious in some varieties than others. Breeding and hybrid crosses have produced many new varieties in recent years. Combine with hostas and ferns for shade garden color all summer.

An Excellent Shade Plant

*Heart-shaped blooms
on arching stems*

Crater resistant

About This Variety: Dicentra 'Fire Island' PP22488 is the best of the best and an improved version of Burning Hearts. It's all in the details - faster grower, more prolific, blooms earlier in the season and is more disease resistant.

Growing Instructions: Performs best in moist, rich soils with some shade.

Care Tip: Do not allow soil to dry out during summer.

Blooms: April to July

Exposure: Full sun

Height: Grows 10-15" tall

Spacing: Plant 18-24" apart, 1.5-2" deep

USDA Zones: Hardy in USDA zones 4-7

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
