

POWER WIZARD®

PROFESSIONAL LINE | ELECTRIC FENCE TESTER

The Wireless 5-Light LED Tester simplifies testing your electric fence. It measures the approximate voltage from any position on the fence line and the output voltage directly from the energizer. The bright LED lights are easy to read, and there are no extra wires or ground probes needed. Simply touch the top of the tester to the electrified fence or energizer fence terminal and push the tester button.

- Measures from 2,000 volts to 10,000 volts
- No ground probe or extra wires required
- Highly visible LED lights
- One 9V Battery (Not Included)
