About This Variety: Our table top paperwhite kit with a round rattan basket comes with everything you need to grow these exotics: six paperwhite bulbs, a 6" standard plastic nursery pot, a 6.5" brown real rattan basket, planting medium and a set of growing instructions. Bulbs are essentially storage mechanisms and already contain everything needed to grow and produce flowers.

Growing Instructions: Paperwhites are tender bulbs and need to be planted in pots indoors in winter throughout most of North America. To grow indoors as a house plant, proceed as follows: Expand the soil block that comes with the kit following the included directions. Fill half the pot with the growing medium. Set the bulbs atop the soil, filling in with soil around the bulbs to maintain the upright position. The top third of the bulb should be left exposed above the soil level, leaving room in the pot for watering. Paperwhite bulbs like room temperatures. Exposure to sunshine will keep them shorter. As the flower stalks grows towards the light, rotate the pot frequently to prevent toppling. Sit back and enjoy!

Care Tip: They are best rooted at cooler temperatures, below 60°F. Once rooted, a somewhat warmer house temperature is preferred. Too hot or too dry environments may hinder flowering. The less light paperwhites receive, the taller they will grow.

Exposure: Indirect light

Height: Grows 12-18" tall

Spacing: 1-2" deep with point just above soil surface

USDA Zones: Hardy in USDA zones 8-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
