

Van Zyverden's
LOW SCENT GIANT 'CHRISTMAS DAFFODIL' PAPERWHITES

Paperwhites are non-hardy tazetta daffodils that can be forced and grown inside the home without any cold exposure, special handling or treatment. Fun and easy to grow in pots in soil or water in a favorite vessel.

*Inbal is the lowest scent
paperwhite variety available*

Timeless beauty

*Largest mammoth bulbs
commercially available*

About This Variety: Inbal Paperwhites are low scent and produce clusters of pure white blooms 4-6 weeks after potting. Very easy to grow. Special handling or treatment is not required. Each bulb is so large that it will likely produce 3 to 4 stems per bulb. Due to bulb size, they are best spaced further apart than normal and require fewer bulbs per planting vessel. Truly unique and rarely available at local nurseries or box stores in this special bulb size. A Van Zyperden special offer!

Growing Instructions: Paperwhites are tender bulbs and need to be planted in pots indoors throughout most of North America. To grow indoors choose a pot of your choice and fill about halfway with the medium. Place the bulbs atop the soil, filling in with soil around the bulbs to maintain the upright position. The top third of the bulb should be left exposed above the soil level, leaving room in the pot for watering. Paperwhite bulbs like room temperatures. Exposure to sunshine will keep them shorter. As the flower stalks grows towards the light, rotate the pot frequently to prevent toppling. Sit back and enjoy!

Care Tip: They are best rooted at cooler temperatures, below 60°F. Once rooted, a somewhat warmer house temperature is preferred. Too hot or too dry an environment may hinder flowering. The less light they receive, the taller they will grow.

Exposure: Full sun to partial shade

Height: Grows 18-24" tall

Spacing: Plant 6-8" apart, 6" deep

USDA Zones: Hardy in USDA zones 8-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
