Auto	✓	Parking Brake	✗	Manual Pedal
67"	✓	Overall Length	✗	76.7"

ABOUT greenworks™

We've never been gas – we've been battery-centric from the beginning. Since 2002, Greenworks has been the industry leader in battery innovation, setting the standard for the cordless-powered world. Our lineup of residential and commercial-grade mowers, blowers, power tools and more have been built from the ground up, integrating battery-first design and customer feedback to create powerful tools anyone can use.

The end result? You'll never give a second glance to other brands on the market that stick a battery into a tool initially designed to be gas. With Greenworks, every task on your To-Do list is backed by a company that has been firmly in the battery-powered camp since day one. Our thousands of five-star reviews can attest to our singular focus: helping you get any job done with superior battery performance, each and every time.

The Benefit of Going Greenworks

When you buy Greenworks, you can rest assured that you're purchasing a product designed with the American homeowner and landscaper in mind. With our headquarters located in Mooresville, NC and manufacturing facilities in Morristown, TN, our commitment to American manufacturing remains a cornerstone of our business.
