5 GALLON JUG

WORKS WITH THE  
HOSEBENDER  
(SOLD SEPARATELY)

**EZ3**  
3 GALLON JUG

LARGE RUBBER GASKET  
PREVENTS LEAKING

**THREE HANDLE  
DESIGN**

TRANSPARENT  
THICK WALLED  
HIGH-DENSITY  
POLYETHYLENE  
CONSTRUCTION

REAR MOUNTED AND  
SIDE VENTED BREATHER  
REDUCES SPILLING!

The EZ Utility Jug is exactly what the name implies. It is easy to use. The EZ Utility Jug comes in 2 sizes: 3 Gallon (12 Liter) / 5 Gallon (19 Liter). It has a triple handle design that is completely unique. Carry and pour with confidence knowing that the EZ3 is constructed from thick-walled, high-density, polyethylene plastic, ensuring it is durable enough to hold up to any fluids you may transport. The vent on the EZ jug keeps it far from the main cap ensuring plenty of venting without the spills.

CAN BE LOCKED TO  
PREVENT THEFT!

FLOOR MOUNT ACCESSORY PREVENTS TIP-OVERS DURING TRANSIT (SOLD SEPARATELY)

# hose bender

PATENTS PENDING

**A PREMIUM SPOUT  
FOR ANY UTILITY JUG**

The Hose Bender is a universal utility jug spout which uses the cap and lanyard to create a natural bend to the hose. This bend is what makes it easy to place your spout into your fill tank without spilling fluids. It also makes pulling the hose out of the tank easy, reducing spilling and spraying when your tank is full and you need a quick exit.

This beast of a spout is constructed from HDPE Plastic ensuring it is chemical resistant and durable. The Hose Bender also offers numerous upgrades including a threaded CNC anodized aluminum cap, stability hook, molded hose clamps, compression fittings and more!

## hose bender

**EASY ENTRY INTO YOUR TANK**

**NEVER FIGHT WITH YOUR SPOUT AGAIN**

# hose bender

PATENTS PENDING

## 3/4" FIT

The Hose Bender works perfectly with the Risk EZ Utility Jugs, but still threads onto any powersports utility jug with a 3/4" threaded cap.

## EZ UTILITY JUG x 2

\*SOLD SEPERATELY

## EZ UNIVERSAL FLOOR MOUNT

\*SOLD SEPERATELY

## ANODIZED CNC ALUMINUM CAP

The cap is CNC aluminum and anodized red to match the breather on the EZ Utility Jugs. This design screws into the body and traps a nitrile rubber O-Ring to ensure no leaking or popping out during transport.

## STABILITY HOOK

Located at the end of the spout is the ingenious "Stability Hook". This hook rests on the lip of the tank being filled and helps stabilize and control your utility jug while pouring. This simple but innovative design feature is a huge asset when filling any tank.

## SMALL DIAMETER BODY

The body is small in diameter to improve fit into all filler holes and improve sight around the nozzle to keep an eye on fluid levels. The inner walls are designed to improve the smooth flow of fluid.

## MOLDED HOSE CLAMPS

The Hose Bender includes two custom molded hose clamps to prevent leaking. Not only are these hose clamps functional, but aesthetically they are a premium upgrade over ugly metal hose clamps.

## COMPRESSION FITTING

The 3/4in threaded hose adapter offers a flange at the top of the threads. This flange traps the nitrile O-Ring creates a compression fitting ensuring no leaks while pouring or transporting fluids.

# EZ JUG FLOOR MOUNT

**STEP 1**  
Angle jug into mount

**STEP 2**  
Press jug down into mount

**STEP 3**  
To remove just pull jug up

**LOCKABLE**  
(lock not included)

**NO BUNGIE CORDS  
OR TIE-DOWN STRAPS**

**QUICK, SIMPLE & STABLE**

## TRANSPORT SECURELY

Safely securing a utility jug for transport can be a hassle, and tip overs can be a terrible mess, however Risk has solved this issue. The EZ utility jug has a floor mount accessory called The EZ Floor Mount. This hardened steel frame mounts easily to the floor of a trailer, van or truck bed. The EZ Utility jug then snaps right in place, preventing it from falling over during transit. The EZ Floor Mount fits both the 3-gallon & 5-gallon EZ jugs. Additionally, a padlock can be placed through the EZ Floor Mount to securely lock the EZ Utility Jugs to your truck or trailer, protecting your investment.
