

'Miss Molly'

Buddleia 'Miss Molly'

pp#23,425, cbr#4446

Common name: butterfly bush

Landscape Info:	
USDA/AHS zones:	USDA 5/AHS 9
Mature height:	4-5'/1.2-1.5 m
Exposure:	Full Sun
Irrigation:	Moderate

Features & Benefits:
<ul style="list-style-type: none"> - Nearly-red flower color is intense and unusual, especially in warm climates - Continuous blooming, with an elegant, vase-like habit - Non-invasive and approved for sale in OR & WA - Landscape-friendly 4-5' height - Deer resistant

Cultural info:		
pH Level:	5.6 – 6.2	
Nutrient Needs:	Average	
EC (2:1 extract):	0.6 – 0.9	
Light Level:	High	
Watering:	Moderate (good drainage imperative)	
Rooting Out Temp:	65° - 72°F/18.3-22.2° C	
Overwintering Temp:	40 - 50°F/4.4-10° C	
Sales Window:	Spring through summer	
Blooms On:	New wood	
Trimming/pruning:	Trim 2-3 times	
Vernalization:	Not required	
Vigor Rating:	High	
Finish Size	Liner Size	Weeks of Active Growth to Finish
1 gallon	2 ¼" • 4" • QT	6-8 • 5-7 • 4-6
2 -3 gallon	2 ¼" • 4" • QT	12-14 • 11-13 • 10-12

Grower Tips:
<ul style="list-style-type: none"> • One of the fastest shrubs to produce. • Buddleia will rebloom approximately 4-6 weeks after trimming in summer. Multiple crop cycles will give you a continuous supply of ready-to-sell product, covered with large terminal blooms. • Does not require deadheading for continuous bloom. • Buddleia are susceptible to spider mites; scout often and treat aggressively. Downy mildew and aphids may also occur. • Avoid drought stress to minimize wilting and pest issues. • Taper off fertilizing and excessive watering in late summer to minimize damage if crop is to be overwintered. Keep on the dry side when dormant. • Avoid fall pruning, and in spring, do not cut until new growth begins to emerge on stems. • Not recommended for fall sales/planting in zone 5.
NOTES:
