White Pillar® Rose of Sharon Hibiscus syriacus

EATURES

A new color for this unique rose of Sharon series!

White Pillar® rose of Sharon is a sister plant to Purple Pillar®, the plant that changed how you think about rose of Sharon. Both naturally grow as a narrow column, so it takes up just a fraction of the space that conventional roses of Sharon do. This particular variety sports pure white, semi-double blooms, making it an elegant choice for planting in any style landscape and along with any type of architecture. This unusual, space-saving habit unlocks so many new design possibilities: plant alongside your front entrance, as the centerpiece to a formal container, as a privacy screen, or a dramatic specimen. It's easier than ever to enjoy this summer-blooming favorite.

Top reasons to grow White Pillar rose of Sharon:

- Narrow, space-saving habit is unlike other rose of Sharon.
- Doubled white flowers work with any home and color scheme.
- All the easy care reliability you expect from roses of Sharon.

Water Category: Average

Uses: Border Plant Container Good for Screening Landscape Mass Planting Specimen or Focal Point

Uses Notes:

The only limit to the uses of the versatile, unique rose of Sharon is your imagination! We do recommend it get a minimum of six hours of bright sun for best looks and performance.

Maintenance Notes:

Rose of Sharon requires essentially no special care. A good 2-3" layer of shredded bark mulch would be a welcome addition to the root zone. Pruning is rarely required but can be done in early spring. If you wish to fertilize, a granular fertilizer formulated for woody plants, like a rose fertilizer, can be applied in early spring, once the ground has thawed.

Rose of Sharon can be quite late to leaf out in spring, so do be patient.
