

BASE-CLAMPS HOW IT WORKS:

STEP 1

Select the right size clamp
(Various sizes sold
separately)

STEP 2

Select the base & ring
clamp that coincides with
what you need to mount
2A. Use protective film to
prevent any paint
damage **2B.**

STEP 3

Lock it in place

The self locking clamp design
allows for easy one person
installation. Simply slip the clamp
over tube and lock in your base,
secure using the stainless
mounting hardware and you are
ready to Mount Up and Move Out.

NOTE: Ring clamps 2" & over in size may
require pre-stretching to help spread the
clamp over the tube. (Use Protective film
when mounting)

SMALL/ LARGE STRAP BASE

INSTRUCTIONS

STEP 1

Choose a mounting location (A).

STEP 2

Position & mount Soft Tool Mount, Small/Large, base to the appropriate sized clamp ring for the vehicle by clicking clamp rings into the base (B)*. Then use a 3/16" hex key to fasten the screw & nut included with the clamp ring. Continue until clamp is tight and does not move.

Note: Do not exceed 200 inch-pounds.

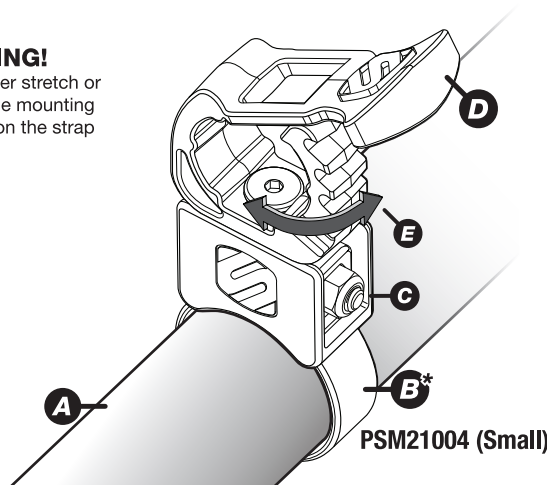

STEP 3

Use the rubber pull strap to secure the object. Make sure the pull tab is securely engaged into the 'teeth' of the tool mount base (D).

Note: The rubber clamp can rotate about as needed. No need to loosen or otherwise adjust the pivot screw (E).

WARNING!

Do not over stretch or exceed the mounting capacity on the strap

Clamp Removal:

In-order to remove the tube clamp from location, the clamp must first be tightened to allow base removal. Once tightened, loosen the clamp and carefully squeeze clamp to remove from the location.

Note: Use protective film to help avoid damage to the paint.

*Various ring clamp sizes available (sold separately w/ hardware).
