

Easy Set[®] Rat Trap

Instructions

1. Release the arm bar from the staple.
2. Move the arm bar to the back of the trap so it hangs over the back of the trap.
3. Apply a small amount of peanut butter, bacon, dry pet food or nuts to the yellow pedal on the trap as shown. Be sure to use a Q-tip, toothpick or another tool to bait so your scent is not transferred onto the trap.
4. Pull the kill bar back and hold in place with your thumb.
5. Take the arm bar over the kill bar and latch the end of the arm bar under the yellow pedal. Please take note to the Firm and Sensitive setting. The trap will be easier to set on the firm side, but not trip as easy. The trap will be more difficult to set on the sensitive side and trip very easy.
6. Place the trap where you have seen signs of rodent activity or along the wall where rodents primarily travel. The end of the trap where the yellow pedal is baited should be placed flush against the wall.
7. After the rat is caught, properly dispose of the dead rodent. The trap can either be discarded or reused.
