

# HOW TO PLANT

## IN 3 EASY STEPS

### 1. DIG A HOLE

Dig a hole twice the width of the pot and deep enough so that when you place the plant in the spot, the top of the root ball is level with the ground around the hole. Fill in the space around the plant with a planting soil mix (you can buy this where you buy the plant) and press the area down with your foot.

### 2. WATER

Give the plant a good watering to help it settle in.

### 3. RELAX!

Now sit back and enjoy your new Bloomin' Easy® plant.
