

**ELECTROLYTES + PROBIOTICS
+ PREBIOTICS + OREGANO**

There is hope! Severe stress heightens the risk of mortality, reduces immune function and could lead to death rapidly. The unique combination of probiotics, prebiotics, oregano, and electrolytes promotes immunity and reduces the risk of mortality.

Product Details

- Item #81054
- UPC Code: 8 50031 91854 2
- MSRP: \$17.99
- IMAP: \$15.29
- Net Weight: 8 oz
- Inner Case Quantity: 6 8-oz boxes
- Master Case Quantity: 8 inner cases

RECOVER 911™

In severe situations, call Recover 911!

Severe situations are beyond stressful and emergency help is always welcome. Causes of severe stress in chickens include prolonged weather extremes, social hierarchy, predator attacks, and exposure to germs. Recover 911™ provides electrolytes, probiotics, prebiotics and oregano for coop emergencies, ensuring the right care at exactly the right time.

Symptoms of severe stress among chickens include labored breathing, loss of appetite and thirst, reduced or stopped egg laying, diarrhea/pasty butt, lethargy, and isolation.

The science-based difference!

FlockLeader Recover contains gut-sourced bacteria that can survive and thrive in the gut. Ground-sourced bacteria, which may be used in alternative products, are not able to live within the gut.

Health is not “one size fits all.” Each product within the FlockLeader brand contains specific strains of bacteria to perform certain functions according to stage of life or stress and sickness factors.

Microencapsulation of the bacteria extends the shelf life and viability. This unique technology is used across the entire FlockLeader brand, ensuring product guarantees are being met.

A look inside our formulation

FlockLeader Recover 911 helps the recovery of a flock by reducing bad bacteria and preventing dehydration.

- Specifically selected strains of probiotics that help improve a stressed gut.
- Prebiotics that feed the good gut bacteria.
- Electrolytes to help with hydration and allow for a quick recovery.
- Oregano, which has strong antimicrobial properties and can improve growth.
- Plasma, which improves survivability and immunity.

Easy to use

Recover 911 is mixed in the drinking water for a recommended seven consecutive days during times of sickness, injury, stress, or hot weather.

Turning things around is easy!

FlockLeader Recover 911 is mixed at the rate of one teaspoon per gallon of water for severely stressed chickens, regardless of age and is safe for all poultry species.

RECOVER 911™

Frequently Asked Questions

How is Recover 911 given to the flock?

Recover 911 is a water supplement mixed into the flock's drinking water. We recommend mixing one teaspoon of Recover 911 per one gallon of drinking water. For example, for a seven-gallon drinker, seven teaspoons would be used.

How often should Recover 911 be given to the birds?

We recommend providing Recover 911 at the first signs of severe stress, sickness, or during hot weather for seven consecutive days.

Can Recover 911 be used every day?

We recommend using Recover 911 only at the first signs of severe stress for seven consecutive days until the symptoms subside. For a daily digestive health maintenance, without signs of stress, we recommend using FlockLeader™ Arrive™ and FlockLeader Thrive™.

Can Recover 911 be used only with poultry of a certain age?

Nope! Recover 911 can be safely used with severely stressed poultry of any age and stage of life, including young chicks.

How many servings are in one box of Recover 911?

In one 8-oz box there are 45 servings when mixed according to the directions of using one teaspoon per one gallon of water.

What is the proper way to store Recover 911 between uses?

Recover 911 should be kept in a cool, dark place away from moisture or water sources. If there is a chance of moisture, we recommend storing in an air-tight container to keep moisture and water out.

What is the shelf life of this product?

When stored properly, in a cool dark place away from moisture, Recover 911 has a two-year shelf life.

Would Recover 911 be beneficial when isolation happens within the flock?

Yes! Isolation is a sign of severe stress! The animals who are isolating themselves should be separated from the flock, quarantined, and given Recover 911

to help with recovery and alleviate the chance of further stress or even death. In this situation, we also recommend providing Recover Plus™ to the rest of the flock to address their potential for stress or illness, the symptoms for which may not yet have become evident.

Would Recover 911 be beneficial with lethargic birds?

Lethargy in birds is a sign of extreme stress! We recommend providing Recover 911 as soon as lethargy is identified.

Why is oregano used in this product?

At Perdue, we have been using oregano in our chicken diets for many years. Oregano is used as an antibiotic alternative. Recover 911 contains oregano and probiotics that can support a flock's health during times of severe stress.

What is animal plasma?

Animal plasma is a crucial ingredient in Recover 911 because it works in tandem with the probiotics also formulated in the product. Probiotics signal cells to initiate an immune response and plasma responds with beneficial proteins, like antibodies, to support the immune system. This dual approach is extremely beneficial to support the immune system of severely stressed, sick, and injured birds.

What are CFUs and why are they important?

CFU stands for colony-forming unit. This is a unit of measurement to determine the number of live, good bacteria (probiotics) in the product. Recover 911 contains 2 billion CFUs per serving, which ensures there is enough good bacteria being fed to the flock.

Does Recover 911 have a withdrawal period?

No. Recover 911 is a probiotic supplement, therefore it does not have a withdrawal period.

Is Recover 911 safe for all poultry species?

Yes! The entire FlockLeader brand of products, including Recover 911, was made to benefit all poultry and waterfowl species.
