# What is Daily Red®?

Salt is essential for health and hydration, yet many horses fall short of daily requirements if they're relying solely on a lick. The versatile loose form of Daily Red ensures horses receive a complete serving of essential salt. And because the trace minerals are balanced by nature, they work in harmony and taste good without fillers or flavors.

## THE FOUNDATION OF DAILY RED®

## DAILY HYDRATION TRIGGER

Redmond mineral salt encourages drinking and water absorption into the bloodstream for comprehensive hydration.

## ESSENTIAL LOOSE SALT

Salt also facilitates healthy nerve and muscle contraction for smooth movement and higher performance.

## BALANCED TRACE MINERALS

A full spectrum of balanced, nature-made trace minerals promotes wellness and a vibrant, healthy appearance from head to tail.

## MINED IN UTAH, USA

Daily Red is mined from Redmond's ancient and protected deposit and contains more mineral content than both white salt and Himalayan.

## NO FILLERS OR FUNNY STUFF

We keep our supplements simple. Daily Red's foundation of delicious, bioavailable sea minerals means horses happily eat it up and minerals go to work, not to waste.
