

# INSTRUCTIONS

2-in-1 Glass Cleaner and Repellent

Model # 5071268

1. Turn the nozzle to spray-on position.
2. Spray the product directly onto glass, one section at a time. 3. Wipe with a clean towel to remove dirt & grime.
3. Do a final wipe with the dry side of the towel to leave a streak-free, water-beading coating. For best results, allow an hour before exposing to rain/water.
4. Turn nozzle to X position. For dirty surfaces, reapply as necessary. Recommended for exterior vehicle glass only; not for use on clear plastics or painted surfaces.
