PET PROTECTION
YOU CAN TRUST

PetPrevea™ ADVANCED FOR DOGS

WHY IT'S IMPORTANT TO Use a Product With an IGR

Stop the cycle! An Insect Growth Regulator (IGR) prevents treated flea eggs and larvae from developing. An IGR works with adulticides to eliminate the entire flea life cycle.

YOU CAN EXPECT Quick Results

PetPrevea™ Advanced for Dogs is topical and spreads over your dog's body by the natural oils on their skin. The process can happen within 24 hours, so **your dog gets relief fast.**

FOR BEST RESULTS, WE RECOMMEND Regular Monthly Usage

A single application stops fleas, flea eggs and larvae, mosquitoes and ticks for up to one month. You can **use it year-round** to help keep your dog protected from fleas and ticks.

PetPrevea™ Advanced For Dogs is available at your veterinary clinic.

PetPrevea™ Advanced for Dogs is a convenient, easy-to-apply monthly topical treatment and prevention of ticks, fleas, mosquitoes, biting flies and lice.

For dogs only. Do NOT use on cats.

For small dogs

For large dogs

Application site

How to Apply

- 1 Prepare tubes as shown** in “How to Open” on the Package Insert.
- 2 For small dogs 21 pounds and under:** Apply the entire contents of the tube to one spot on the dog’s back between the shoulder blades.
- 3 For large dogs over 21 pounds:** Apply the entire contents of the tube evenly to three or four spots on the top of the back of the dog from the shoulder to the base of the tail.
- 4 At each application site** part the hair of the dog until the skin is visible. Place the tip of the tube on the skin and gently squeeze to apply the solution on the skin. Do not apply an amount of solution at any one spot that could cause some of the solution to run off the side of the dog.
- 5 Discard empty tube and packaging** as described in the Storage and Disposal section.

Under normal conditions the product remains effective for one month. For more information, visit PetPrevea.com

Why PetPrevea™ Advanced For Dogs?

- + Trusted quality and economical value
- + Convenient and easy-to-use dosing tubes
- + 4-months’ supply per box
- + Waterproof and fragrance-free
- + Made in USA

Tips

- + Read entire label before use.
- + Avoid touching the wet application spot.
- + Wait 24 hours to allow solution to dry before bathing or letting your dog swim.
- + Give each dog its own complete dose.
- + In cases of severe flea infestations, retreatment may be necessary sooner than one month. Consult your veterinarian.
