

Applications

City commuting, off road, and trail

Key Features

- **Dual Distance Beams:** Short- and long-range beams for near and far illumination
- **3 Riding Modes:** Preset modes offer controls optimized for different riding scenarios
- **Remote Handlebar Switch:** Adjust output directly from the handlebars
- **OLED Display:** Brightly lit and easy to read display reports key information such as output & battery status
- **Quick-Release Mount:** No extra tools needed, easily attach/detach in seconds

Competitive Advantages

Quality

- Durable, aluminum body with an IPX7 rating
- 2 year manufacturer warranty, including battery

Output

- 1800 lumen combined output
- 182 yards of throw
- Angled-down beam protects pedestrians & vehicles from glare
- Wide beam spread illuminates full area in front of rider

Battery & Charging

- Built-in 6800mAh li-ion battery enables up to 17 hours runtime
- Micro-USB charging port for charging at home or on the go

Price

- **\$129.95**
- Similar bike lights cost \$150-\$250+
