

# BUSHEL *and* BERRY®

JELLY BEAN®

Blueberry

'ZF06-179' | PP 24,662 | CPBR 5,496 | 1,000+ chill hours

Jelly Bean® has large, flavorful blueberries mid-summer that taste like homemade sweet blueberry jelly. The foliage is unlike other blueberries and has unique, elongated, green leaves with highlights of red in cooler climates. Try a mini-hedge along a pathway, in the landscape or in decorative patio containers.

Zones: 4–8

Exposure: Full Sun

Size: 1–2 feet h, Mounded

Berry Size: Medium to Large

Fruit Season: Summer

## Planting Instructions-

First, determine a suitable planting location. Then, dig a hole 3x as wide as the root ball of your plant. This makes it easier for your Blueberry to root in the surrounding soil. The hole should be deep enough that your plant will sit evenly or slightly above the ground around it. Next, mix your native soil with a bag or two of good quality garden soil or composted manure. Backfill the hole with the soil mixture around your plant. Afterward, water your new planting 2-3 times per week for the first growing season.
