

Van Zyverden's
SPRING BLOOMING PATIO PLANTER KIT *with Decorative Faux Rattan Planter*

If you have limited space, no garden at all or just prefer container gardening, this kit is made for you! Container gardening makes it easy to care for your plants. As long as you have space on your porch, deck, patio or balcony for a medium-sized container, you can garden. Our decorative rattan planter (sized 12 x 12 x 16") comes with a hard-shell, inner plastic growing pot, bag of medium, planting stock, gardening gloves and growing directions.

*Excellent for bouquets
& cut flower arrangements*

Easy to grow

*Grows well in containers,
garden beds and borders*

About This Variety: Flower bulbs are the indispensable blooms of the spring garden, as they bring it to life! They are suitable for a wide range of plantings and make great container plants. To assure an impressive display, included are 10 Tulips Annie Schilder, 25 Muscari Grape Hyacinths, and 10 Narcissus Minnow. For maximum versatility, all bulbs are individually bagged and labeled.

Growing Instructions: First, decide where you be placing the planter and if you want the pot to drain or not. Proper drainage is key if you will be placing the planter outside. If placing it outside, remove the drainage plug(s) from the bottom. Then empty about 85% of the medium bag(s) into the pot, then firm and smooth the planting medium. Place the bulbs pointed end up onto the soil, grouping them by type very close together and fill in on top with the remaining medium left. Next, water well and drench the soil deeply as the medium that came with the planter is dry to save shipping weight. You may have to repeat this step a few times the first 2 days, and water thereafter to keep the soil damp. Place planter in a garage, basement, shed or sheltered area that maintains a temperature of 45-50°F for 12 to 16 weeks (fall planted flower bulbs need to go through their dormancy phase by being exposed to colder temperatures in order to develop properly and bloom in spring), without risk of freezing and thawing. After the dormancy phase you will see the bulb tips poke through the soil, at which time, after risk of freezing has passed, the planter can be relocated outside on the patio.

Care Tip: Plants in containers are above soil level and exposed to the elements which make them more prone to freeze damage during the winter than plants planted in the garden. Take extra precautions and overwinter the planter in a protected area (shed or garage) during freezing temperatures (best to provide a winter environment that is one zone hardier than your area).

Exposure: Full Sun to Partial Shade

Blooms: Spring

Height: 6-16"

Spacing: Plant 0.05" apart, 4" deep

USDA Zones: Hardy in USDA zones 4-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
