

Van Zyverden's
PEONY CORAL SUNSET

Peonies are perennials that will live for decades, even generations. The blooms are outrageously beautiful, producing lush, glossy, green foliage all summer long, turning purplish or gold in the fall. Peony blooms are available in a wide range of colors, textures and shapes. A favorite among florists. Peonies attract hummingbirds and butterflies to the garden and are deer resistant.

Gorgeous, showy blooms

Excellent for cut flowers

Returns and blooms year after year

About This Variety: Coral Sunset is among the first peonies to bloom each season. Its flowers are semi-double, very large and change color as they mature from coral orange to salmon to cream to white.

Growing Instructions: Plant Peonies outdoors in spring after all danger of frost has passed or in the fall before the first frost hardens the soil in a partially shaded location. The ideal soil is rich and porous and drains well, yet still holds enough water for the roots. If your soil is heavy clay and drains slowly, or very sandy and does not hold water, add organic soil amendments like peat moss or ground bark. Spread a 3-4 inch layer of soil amendment if needed and incorporate into the soil to a depth of 10 inches. Plant roots 1-2" deep and 24-48" apart. Cover with soil. Water thoroughly at planting. While actively growing, water frequently and thoroughly so that water will reach roots. Mulch to keep the soil cool and to prevent the soil from drying out. Fertilize every three months.

Care Tip: Treat regularly to control chewing insects, leaf blight and mildew. Divide in late summer every 3 to 4 years.

Exposure: Full Sun to Partial Shade

Blooms: Spring to Summer

Height: Grows 32-36" tall

Spacing: Plant 24-48" apart, 1-2" deep

USDA Zones: Hardy in USDA zones 2-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us. 871989
