PREPLANTED AMARYLLIS RED LION *with Red Cache Ceramic Planter*

Nothing signals the onset of the holiday season than the appearance of Amaryllis bulbs. Amaryllis are one of the easiest, if not THE easiest, bulbs to grow! The bulb itself contains everything it needs to grow and produce blooms that will brighten your indoor spaces. Amaryllis can be grown with or without soil. Amaryllis blooms are available in a wide range of shapes, sizes and colors. Their beautiful blooms are a sight to behold during the dreary winter months.

*Force indoors*

*Excellent for cut flowers*

*Easy to grow for indoor decorating*

*About This Variety:* This preplanted holiday amaryllis red lion is ready to start growing. No planting equals no mess! Just add water.

*Growing Instructions:* Place in a warm room (70-75°F) in indirect light. Keep soil moist. Water more frequently as leaves grow and flowers open. Turn plant when stems lean toward the light. Support-top heavy plant with stakes or small stones at the base. After the amaryllis has bloomed indoors, water and fertilize regularly. When leaves start turning yellow, water only as needed to keep the soil moist until the foliage dies. Maintain indoors. When all danger of frost has passed and when the ground outdoors is workable, bulbs can be planted outside to naturalize in USDA hardy zones 8-11. In non-hardy zones, dig up bulbs just before frost. Let dormant amaryllis remain dry through summer. Cut off dry, yellowed foliage just above the bulb. Repot every 2-3 years.

*Care Tip:* Amaryllis blooms will last longer if the plant is moved to a cooler place at night (45-55°F).

*Exposure:* Indirect Light

*Blooms:* Indoors in Winter

*Height:* 18-24"

*Spacing:* Spaced evenly in container; 2-3" apart. 2-3" deep with top 'point' of bulb exposed above soil line.

*USDA Zones:* Indoor forcing; Grow outdoors as Perennial in zones 7B-11.

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us. 884349
