**PAPERWHITE KIT ZIVA** *with Iron Brass Fluted Finish Large Bulb Planter*

Narcissus are excellent for growing indoors in containers. Narcissus paperwhites are the most well known of indoor forcing narcissus. These flower bulbs will grow in soil or water with rocks or decorative stones. Expect delightfully fragrant blooms indoors during the dreary winter months. Very easy to grow with no special handling or treatment required.F40

*Complete kit for forcing indoors*

*Easy to grow holiday color*

*Delightful fragrance*

*About This Variety:* Our paperwhite kit comes with everything you need to grow this exotic plant: eight paperwhite bulbs, a nursery pot with drainage, planting medium, sheet moss for top dressing and an iron ribbed, brass-like finish decorative planter - approximately 7 x 7 x 6.75".

*Growing Instructions:* To grow in soil, peatmoss or vermiculite, place bulbs near the surface so their noses, or points, are visible. After planting, water well then drain water out to just below the bottom of the bulbs. To grow without soil, fill container with pebbles or decorative stones with a minimum height of 2" or to a maximum height of 1" below the top of the container. Place the bulbs on top of the pebbles; a few small pebbles may also be placed between bulbs for support. Add water to the container until it reaches just below the bottom of the bulbs. Place container in a warm location where the bulbs will receive indirect light. After the paperwhites have bloomed indoors, add water as needed to maintain the leaves. When all danger of frost has passed and when the ground outdoors is workable, bulbs can be planted outside to naturalize in USDA hardy zones 8-11.

*Care Tip:* Paperwhite narcissus bulbs can be kept for months and should be planted approximately 6 weeks before desired bloom time. Store bulbs before planting at 65°F or cooler. Paperwhites grow equally well in soil or without soil in a container with pebbles and water.

*Exposure:* Indirect Light

*Blooms:* Indoors in Winter

*Height:* 16-24"

*Spacing:* Spaced evenly in container; 1-2" apart, 1-2" deep with top 'point' of bulb exposed above soil line.

*USDA Zones:* Indoor forcing; Grow outdoors as Perennial in zones 7B-11.

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us. 884639
