

How to Plant

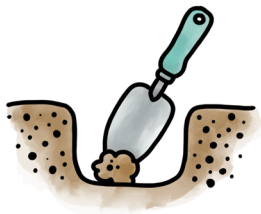

LAVANDULA 'SENSATIONAL!®'

Lavandula 'Sensational!®' grows best in well-drained soil, in full sun.

Dig a hole twice the width and same depth as the pot.

Carefully hold the edge of the pot and tip the pot to gently remove the plant.

Place the plant in the hole and backfill with the soil you dug out initially. Water at the base of the plant.

Do NOT mulch, as this will lead to root rot.
