

INSTRUCTIONS

Rain-X Spot-Free Car Wash

Model# 620034

For best results avoid washing the car in direct sunlight. Wash one section at a time in the shade.

1. Hose off heavy dirt and debris from the vehicle
2. Add 1oz of Rain-X® Spot Free Car Wash to an empty bucket and mix with 1 gallon of water.
3. Apply soapy water to a portion of the vehicle's surface using a clean wash mitt, sponge or 100% cotton cloth
4. Rinse off with clear water thoroughly. Watch the water sheet off and dry spot free before your eyes.
5. For newly waxed surfaces, pour a little car wash directly on sponge/wash mitt as you wash the vehicle.
