

QUICK START GUIDE

ANYWARE® AQ-115 FRY PAN

Congratulations on your purchase or gift of this amazing ANYWARE® indoor-outdoor cookware! Complete instructions and our limited lifetime warranty are in the Use & Care Guide accompanying this pan. The guide has a lot of important information, so please be sure to read through it! If you can't wait to get cooking, here are a few tips to get started:

1. Turn down the heat! This professional-quality 7-ply cookware warms quickly and does not need high heat to brown foods.
2. We call it “ANYWARE” because you can use it in so many places - indoors and outside! This cookware is rated to 500° Fahrenheit for use on gas, electric and induction stoves, over charcoal, gas, and campfire grills, and in the oven! The handles can get hot, especially over grills or campfires, so use oven mitts or potholders to lift the pan if you're not sure.
3. Please wash before first use. ANYWARE cleans up easily - hand washing with gentle detergent and a sponge will keep it looking awesome. If it gets really dirty, hot water and a non-scratch scrubbing pad should have it sparkly again in no time!
4. This pan is crafted in the USA from high-quality metals. It contains multiple layers of stainless steel and aluminum, including a 100% stainless steel cooking surface. A bit of oil or butter when cooking will help to prevent food from sticking, as will pre-heating for two to three minutes before placing cold ingredients into the pan.
5. Metal utensils may be used, but they can scratch your pan - wooden or heat-rated silicone utensils will minimize scratching.
6. We love talking about food and cookware! If you have a question, need some advice or want to brag about something terrific that you cooked, email us at info@littlegriddle.com or call us at 248-952-5700!
7. Show off what you made and definitely loop us in! Instagram / Twitter: @littlegriddle / #littlegriddle / #cooklikeyoumeanit

Have fun and thank you for choosing ANYWARE!
