

VP TRIGGER® HOSE FLUID CONTROL SYSTEM

VP Trigger® is a patented push-button, self-venting, control flow valve that's developed for use with VP Motorsport Containers®. It takes seconds to install and makes refueling extremely efficient and a breeze. Simply tilt your container and press the Trigger button for flow and release the Trigger button to quickly stop the flow.

As a result of its unique no-spill design, you can say goodbye to the days of watching fluid spill on your expensive graphics, or the floor.

Easy to install and use

Full control of fluid flow

No-spill design

No external ventilation required

Note: VP Racing containers and U jugs are solely intended for use with non-fuel or non-kerosene products and must not be used to transport fuel or kerosene. For storage and transport of recyclable automotive fluids, non-potable water, feed attractants and other outdoor products.
