

Feed Trough

Instruction Manual

contents:

- 1 - trough
- 2 - 0.25" 2.5" washer head screw, T25

Setting Up Your Feed Trough

CONFIRM THAT ALL PARTS ARE PRESENT, BEFORE BEGINNING ASSEMBLY.

1. Items to note before starting.
 - a. To use with horses, the recommended height for the feed trough from the floor to the top of the trough is 42". However, this can be adjusted according to the type of animal this trough will be used for.
2. Find the studs. Place a mark on both studs at the height you would like to hang the feed trough.
3. Place the screws in the holes of the feed trough and fasten, ensuring the screws hit the studs.

Optional Hay Rack Add-on: If you purchased a hay rack with the feed trough, we recommend placing the hay rack 16" above the feed trough, measuring from the top of feed trough to the bottom of the hay rack.

Not to exceed 30 pounds.
